#### **Explanatory note**

Methodical recommendations are intended for the organization of independent work of students in extracurricular time during the clinical practice "Junior medical staff assistant ". This practice is part of the specialty program 31.05.01 General medicine.

Independent extracurricular work is planned within the framework of the curriculum activities of students, which is carried out on assignment, with the guidance and control of the teacher, but without direct participation.

The purpose of independent extracurricular work – mastering knowledge, professional skills and practical skills, the development of independence, organization, creative approach to solving problems of educational and professional levels.

The objectives of the organization of independent extracurricular work is to:

1. Motivate students to learn the curriculum.

2. To broaden the horizons of students, to deepen their knowledge, to develop the skills of research activities, to show the elements of creativity.

3. Promote the development of General and professional competencies.

4. Create conditions for the formation of students ' ability to self-education, self-government and self-development.

For out-of-class study offers check sheets for training, mastering and consolidation of practical skills.

#### The course aims

Aim of the Course of the 1 course students is to consolidate skills for the care of patients, the use of medical equipment and instruments, experience of independent work as assistant nurses by participating in the activities of the Department.

#### The course objectives

In this case, the objectives are to consolidate the theoretical knowledge and practical skills in the care of patients:

- Fixing the rules of asepsis in the areas of the hospital and the organization of a sanitary mode of the functional units of the Department (sanitary-hygienic regime in the wards, emergency Department);

- Consolidation of the rules of clinical hygiene of medical personnel (treatment of hands, body hygiene, dress codes, hospital infection);

- Consolidation of the rules to operate biological materials (hygiene secretions, feeding the seriously ill);

- Consolidation of knowledge on observation and care of patients with pathology of internal organs and systems from the standpoint of the assistant Junior medical staff (help with vomiting, the rules of production of enemas, cans, mustard, preventing bedsores, measuring blood pressure, etc.).

#### **Proposed results**

The course is aimed at the following competences:

Competence index. Content of a competenceThe proposed results of the course students are:(or a part of it)			
GPC-10:	To know:		
the willingness to organize patients care	- organization of work and structure of (medical institutions) health care facilities;		
and provide primary	-emergency prevention of the HIV-infection at a		

pre-hospital health care	emergency situation; - features of working the admissions office and specialized
	care units; -the importance of dietary in medical activities to recovery patients, types of therapeutic diets and the importance of proper nutrition in treatment measures to patient recovery.
	To able to: -divide patients on department; - care for febrile patients; - carry out the prevention of bedsores; - change underwear and bed linen; -emergency prevention of the HIV-infection at a emergency situation.
CDC 11.	To own to: -the method of hygienic treatment of hands; -performing toilet skin and mucous membrane care of the mouth, eyes, nose, ear of patients undergoing bedrest; -ways of changing of underwear and bed linen of patients undergoing General and bedrest.
<b>GPC-11:</b> the willingness to use medical devices intended for medical care	
	To able to: -to transport patients to the hospital; - measuring body temperature and register it in the temperature sheet; -to carry out the simplest physiotherapeutic manipulation; - to conduct a cleansing, enemas; - gastric lavage making; - prepare patient for x-ray and ultrasound methods of investigation; -to collect a urine sample: total, according to Nechyporenko, Zimnitskiy.
	To own to: - rules and methods of transporting patients to the hospital; -the method of disinfection of medical objects and products (thermometers, therapeutic tools, the medical equipment, urinals, the sanitary-and-hygienic equipment etc.); -measurement of body temperature and its registration; -methods using tubes, foam pads anti-decubitus mattress for the prevention of pressure sores; - methods of collection of sputum, vomit, stool, urine;

	<ul> <li>methods of nutrition of the patients undergoing bedrest;</li> <li>the method of hygienic treatment of hands before and after eating in the bed;</li> <li>the method of disinfection, handing cutlery after use of the patients.</li> </ul>
<b>PC-1:</b> Ability and readiness for realization of a complex of the actions directed on preservation and strengthening of health and including formation of a healthy way of life, the prevention of occurrence and (or) distributions of diseases, their early diagnostics,	To know: -technics of cleaning chambers, airings of chambers, technics of the current and final disinfection; -features of working the admissions office and specialized care units; -the method of treatment of patients with lice; -the method of anthropometry; -rules of measuring blood pressure; -rules of measuring arterial pressure, to investigate the pulse on arteries; -rules of calculation respiratory rate and to estimate the result.
revealing of the causes and conditions of their occurrence and development, and also directed on elimination of harmful influence on health of the person of factors of environment of dwelling	To able to: -carrying out cleaning chambers, airings of chambers, technics of the current and final disinfection; -carrying out features of working the admissions office and specialized care units; -carrying out anthropometry; -to quantify respiratory motion and to estimate the result; -to measure arterial pressure; -to investigate the pulse on arteries.
	To own to: -technics of cleaning chambers, airings of chambers, technics of the current and final disinfection; -features of working the admissions office and specialized care units; -the method of treatment of patients with lice; -the method of anthropometry; -rules of measuring blood pressure; -rules of measuring arterial pressure, to investigate the pulse on arteries; -rules of calculation respiratory rate and to estimate the result.

## Questions for ongoing monitoring depending on the type and type of practice

- 1. Definition of concept "labour safety"
- 2. The regime of medical establishment
- 3. Actions at detection of a fire
- 4. Kinds of instructing on a labour safety
- 5. Sanitary treatment of patients in the admission Department.
- 6. Sanitary-epidemiological regime in the hospital.
- 7. Current cleaning in the department.
- 8. General cleaning in the therapeutic department.
- 9. Treatment of patients with pediculosis
- 10. The regime of the hospital
- 11. Disinfectant solutions, types, ways of the preparation
- 12. Type of the hospital
- 13. Preventive of an air-drop infection-the rule of carrying and change of masks
- 14. Definition, the method of anthropometry.
- 15. Emergency prevention of the HIV-infection at a emergency situation.
- 16. Nutrition of the patients. Types.
- 17. Ways of artificial nutrition.
- 18. The importance of dietary in medical activities to recovery patients, types of therapeutic diets and the importance of proper nutrition in treatment measures to patient recovery
- 19. Features of the diet  $N_{21}$
- 20. Features of the diet №5
- 21. Features of the diet №7
- 22. Features of the diet №9
- 23. Features of the diet  $N_{210}$
- 24. Rules for receiving food to the patients and storing food
- 25. Sanitary-epidemiological regime in the dining room
- 26. Preparation of the patient for instrumental method of the examination of the internal organs.
- 27. The rule of the storage and disinfection of thermometers
- 28. Methods of temperature measurement
- 29. Types of temperature curves
- 30. Changes in the basic systems of the body in different periods of fever
- 31. Features of the febrile patients care
- 32. Ways of changing of underwear of patients undergoing General and bedrest
- 33. Ways of changing of bed linen of patients undergoing General and bedrest
- 34. Symptoms of pressure ulcers
- 35. Prevention of pressure ulcers
- 36. Rules of collection of the sputum for laboratory studies
- 37. Rules of collection of the urine for general analysis
- 38. Rules of collection of the urine for research according to Nechyporenko

- 39. Rules of collection of the urine for research according to Zimnitskiy
- 40. Rules of collection of stool (feces) for clinical study
- 41. Gastric lavage. Method. Indications, contraindications.
- 42. Enema. Method. Indications, contraindications.
- 43. Type of the urinals
- 44. First aid for vomiting.
- 45. Applying of the warmer. The mechanism of action, indications, contraindications.
- 46. Applying of the bubble with ice. The mechanism of action, indications, contraindications.
- 47. Applying of the warming compresses. The mechanism of action, indications,

contraindications.

- 48. Basic function of the respiratory system.
- 49. Type of the breathing
- 50. Dyspnea. Definition. Type of the dyspnea.
- 51. Rules of calculation respiratory rate.
- 52. Abnormal type of the breathing.
- 53. Characteristics of the arterial pulse.
- 54. The method of the assessing arterial pulse
- 55. The method of the measuring blood pressure (Korotkov's method).
- 56. Type of the transportation of patients
- 57. Technics of stacking of the patient on a stretcher, rise on a ladder, descent
- 58. Moving of the patient: from a bed on wheelchair, from a wheelchair on a bed.
- 59. Functional bed. Definition. Types.

## Checklist for mastering of practical skills

		Evaluation list (check-list) Anthropometry.	
		Actions (elements)	Check mark Yes (1)/no (0)
	1.	To get acquainted with the patient: to say Hello; to specify the name and age of the patient, checking the information with medical documentation; to inquire about the state of health	
	2.	Introduce yourself, define your role	
	3.	Get informed consent of the patient for manipulation	
	4.	Prepare everything necessary to perform the manipulation.	
		Body mass measurement	
	5.	Check the balance adjustment: to do this, open the shutter located above the panel, adjust the weights with the screw: the level of the balance rocker on which all the weights are in the zero position must coincide with the control point. Close the shutter.	
	6.	Suggest and help the patient gently stand (without Slippers) in the center of the weighing pad.	
	7.	Open the shutter and move the weights on the rocker bars to the left until it is level with the control point	
	8.	Close the shutter. Tell the patient the result. Record the data in the medical history.	
		Measurement of growth	
	9.	To help the patient (if necessary) to take off his shoes and stand correctly on the site: the heels and buttocks, the interscapular area touch the bar of the rostomer. To keep your head straight so that the tragus of the ear and outer	
	10.	corner of the eye were in one horizontal line. Lower the bar of the stadiometer to the top of the head of the patient and	
	11.	identify on the scale the number of centimeters from baseline to the bar Help the patient to get off the site (if necessary) or offer to get off.	
	12.	Inform the patient of the measurement result, record it in the medical history	
		Measurement of the circumference of the chest	T
	13.	Suggest the patient to spread his hands to the side.	
	14.	Centimetric tape impose behind the lower corners of the blades, front – men and children at the bottom edge of the areola circles, in women over the breast glands at the place of attachment of the IV rib to the sternum.	
	15.	Invite the patient to lower his hands.	
	16.	Measure the circumference of the chest in 3 positions: - resting state (with quiet breathing); - at the height of maximum inhalation; - after maximum exhalation.	
	17.	Offer the patient to get dressed (if necessary, help).	
	18.	Inform the patient of the measurement results.	
	19.	Write the received data to the documentation	
2		Evaluation list (checklist) Treatment of patients with pediculosis

Evaluation criteria and scales:

- evaluation criteria -performing a skill according to the checklist;

- score – percentage of correct stapes of the check-list;

- scale of assessment(assessment) – 4 levels of assessment of competences are allocated:

high - more than 85% of correct answers;

sufficient - from 75 to 84 % of correct answers;

satisfactory - from 65 to 74 % of correct answers

critical – less than 64% of correct answers.

#### **Documentation of the practice**
