Ministry of Science and High Education of RF Ulyanovsk State University IMEiPC, Medical faculty of T.Z. Biktimirov	Form	
F – Educational program of the practice of HE (specialty)		

1. The course aims and objectives

Aim of the Course: developing the general professional competences necessary for working the procedural nurse.

Objectives:

- to administer of the medical documentation procedural nurse;
- to administer parenteral ways of introduction of drugs;
- to know principles care of patients and to know first pre-medical aid;
- to administer of medical devices for medical aid.

2. Place of the course in the curriculum

The program Course of medical practice « "Procedural nurse assistant .Part II" » is made in accordance with the requirements of the federal state educational standard of higher professional education for specialty 31.05.01 "General Medicine" and refers to the unit of practice B2 « Practice, including scientific research work». Course of medical practice «Nurse assistant» is carried out in the 6st semester (course 3).

Practice to obtain professional skills and experience of professional activity “Training practice Care of the therapeutic and surgical patients. Part I”, Clinical practice “Training practice Care of the therapeutic and surgical patients. Part II”, “Junior staff assistant” «Ward nurse assistant», Clinical practice «"Procedural nurse assistant. Part I" are the previous discipline necessary for studying of this course.

Course of medical practice «"Procedural nurse assistant .Part II" is basis for course of Clinical practice «The assistant of the doctor of a hospital”, Practice to obtain professional skills and experience of professional activity (Assistant doctor of outpatient clinics).

If it is necessary to use partially or exclusively remote educational technologies in the educational process, the table shows the number of hours of work of teaching staff with students for conducting classes in a remote format using e-learning.

3. Proposed results:

The course is aimed at the following competences:

Competence index. Content of a competence (or a part of it)	The proposed results of the course students are:
GPC-6 The willingness for conducting the medical documentation	know: - Medical documentation procedural nurse (sheet prescribing, log-book of strong and narcotic drugs). able to: - carry out sample of prescribing of a list prescribing; - fill in book of carrying out injections and intravenous infusion of the drugs; - fill in the log-book of strong and narcotic drugs. own to: conduct of the medical documentation procedural nurse
GPC-8	know: - methods of parenteral ways of

The room is equipped with specialized furniture for 40 seats, equipped with computer equipment on personal computers / workstations

11. Special conditions for students with disabilities

Students with disabilities and disabilities are trained together with other students (in the study group) or individually (on the personal application of the student).

The determination of places of practice for students with disabilities and disabilities is carried out taking into account the state of health and the requirements for their availability for this category of students. At determination of places and conditions (taking into account nosological group and group of disability of the trained) of practical training on obtaining professional skills and experience of professional activity of the trained for this category of persons individual features of the trained, and also the recommendations of medical and social examination reflected in the individual program of rehabilitation concerning the recommended conditions and types of work are considered.

In determining the place of practice for students with disabilities and disabilities, special attention is paid to safety and equipment (equipment) of the workplace.

Workplaces for practice are provided by the profile organization in accordance with the following requirements:

- for students with disabilities and visually impaired - visually impaired: equipping a special workplace with General and local lighting, ensuring unhindered finding of the specified person of the workplace and the performance of individual tasks, the presence of video magnifiers, magnifying glass;

for students with disabilities and the visually impaired - blind: vehicle specific workplace heat reference points and devices with the ability to use large boldly-contrasting font and Braille, acoustic navigation, which will enable easy finding a person in your workplace and individual assignments;

- for students with disabilities and hard of hearing – hard of hearing: equipment (equipment) of a special workplace sound amplifying equipment, telephones for the hard of hearing;

- for students with disabilities and hearing – deaf: equipping a special workplace visual indicators that convert sound signals into light, speech signals into a text running line, for the smooth finding of the specified person of his workplace and the performance of individual tasks;

- for students with disabilities and hearing impaired – with a violation of the musculoskeletal

Ministry of Science and High Education of RF Ulyanovsk State University IMEiPC, Medical faculty of T.Z. Biktimirov	Form	
F – Educational program of the practice of HE (specialty)		

system: equipment that ensures the implementation of ergonomic principles (the most convenient for the disabled location of the elements that make up the workplace); mechanisms and devices that allow you to change the height and slope of the working surface, the position of the seat of the working chair in height and inclination, the angle of the back of the working chair; equipment with a special seat. compensating for the effort of getting up, special devices for the management and maintenance of this equipment.

Conditions of the organization and practice, preparation of reporting materials, carrying out of the current control and interim certification in practice is provided in accordance with the following requirements:

- Volume, rate, forms of performance of an individual task for the period of practice are established individually for each student of the specified categories. Depending on the nosology, contraindicated (visual, sound, muscle and other) loads are maximally reduced.

- Educational and teaching materials on practice are presented in various forms so that students with disabilities and disabilities with hearing impairments receive information visually (documentation on practice is printed in large print; video materials and visual materials on the content of the practice are provided), with visual impairment – auditory (for example, with the use of speech synthesizer programs) or with the help of tifloinformation devices.

- The form of carrying out the current control of progress and intermediate certification for students with disabilities and disabled people is established taking into account individual psychophysical features (orally, in writing, by means of the computer, in the form of testing, etc.). If necessary, the student is given additional time to prepare a response and (or) protect the report.

- If it is necessary to use partially or exclusively remote educational technologies in the educational process, the organization of work of teaching staff with students with disabilities is provided in an electronic information and educational environment, taking into account their individual psychological characteristics
