1. GOALS AND OBJECTIVES OF THE PRACTICE

Objectives of the practice: formation and consolidation of general professional and professional competencies, studying the organization of the hospital, mastering the basic activities of a general practitioner, a surgeon and an obstetrician-gynaecologist of the hospital.

Objectives of the practice:

- Familiarise yourself with the structure and organisation of general practitioner, surgical and obstetric/gynecological hospitals;
- Familiarise yourself with the main performance indicators of the hospital, the legal and regulatory documents governing the work of the hospital..;
- Study the functional responsibilities of a doctor working in an inpatient setting;
- To study the tactical, legal and organisational aspects of the work of a hospital doctor;
- Familiarity with completing and maintaining medical records (medical history, certificates of incapacity for work, referral to the MSCE, prescription, prescription sheet, discharge summary)
- Mastering the main stages of therapeutic and diagnostic work with patients in hospital conditions, in the process of independent medical activity, supervised and corrected by the teacher leading the practical classes.
- To learn and consolidate practical skills on a mannequin and at the patient's bedside.
- To develop the ability to make and substantiate a clinical diagnosis and to make a differential diagnosis of the underlying disease and its comorbidities.
- Master the application of various rehabilitation measures;
- Study the indications for surgical treatment;
- Master the techniques of emergency care for patients;
- Conducting health education for patients.

All theoretical knowledge, practical abilities and skills acquired by the students during the study of clinical disciplines of the therapeutic profile in classes throughout the academic year at the departments of obstetrics-gynecology, faculty therapy and surgery (7-8 semesters) must be used, concretised and supplemented during the practice.

2. THE PLACE OF PRACTICE IN THE STRUCTURE OF THE OPP

"Clinical practice (Hospital Doctor Assistant)" refers to the basic part of the industrial practice B2.P.4 and takes place in the eighth semester according to FSES 3+ HE (order № 95 от 09.02.2016) and the Working curriculum of specialty "31.05.01 General Medicine", approved by the Rector of Ulyanovsk State University (2016).

The entry knowledge, skills and competence requirements for the discipline are formed by the students:

-in the disciplines of the humanities, social and economic cycle: philosophy, bioethics, history of medicine, psychology and pedagogy, law Latin;

-In the disciplines of mathematics and the natural sciences: physics and mathematics; medical informatics; chemistry; biology; biochemistry; human anatomy, topographical anatomy; pathological anatomy, clinical pathological anatomy; histology, embryology, cytology; normal physiology; pathophysiology; microbiology, virology; pharmacology; immunology;

- In the study of the disciplines of the professional cycle: Hygiene; public health and

health care, health economics; epidemiology; medical rehabilitation; clinical pharmacology; propaedeutics of internal diseases; faculty therapy; dermatovenerology; general surgery, surgical diseases; pediatrics; Radiotherapy and radiology; infectious diseases; phthisiopulmonology; outpatient therapy; occupational diseases; ophthalmology; obstetrics and gynaecology; ENT diseases; hospital therapy; endocrinology; anaesthesiology, intensive care, intensive care; oncology; traumatology; outpatient therapy;

- Various practices after 1-3 years: general and surgical nursing, nursing assistant, ward nurse assistant, procedure nurse assistant.

The study of the section is a precursor for the disciplines: hospital therapy, endocrinology; infectious diseases; phthisiology; polyclinic therapy. Practicum is the precursor for the state final attestation of students.

3. THE LIST OF INTENDED LEARNING OUTCOMES OF STUDENT PRACTICES, WHICH RELATE TO THE INTENDED LEARNING OUTCOMES OF THE QUALIFICATION PROGRAMME

The following competences are formed as a result of the practice "Hospital Doctor Assistant": BPC6, PC5, PC6, PC8, PC 10, PC 11, PC 12, PC 13, PC 14.

Index and name of the competence to be implemented	List of intended results of the practical training, correlated with indicators of competence attainment
BPC -6 - willingness to keep medical records	<p>Know:</p> <ul style="list-style-type: none"> - The basics of Russian legislation, the main normative and technical documents on health care; - the regulations governing the sanitary and epidemiological regime of an inpatient unit; - the main stages of work (job description) of a doctor in an obstetric-gynecological, therapeutic and surgical inpatient unit. <p>Be able to:</p> <ul style="list-style-type: none"> - Properly complete medical documentation for inpatient work (outpatient records, medical history, certificate of incapacity for work, death certificate, staged epicrisis, discharge epicrisis, discharge certificate, voluntary informed consent of the patient, birth history, newborn developmental history, birth certificate); -Determine groups for referral for rehabilitation of therapeutic, surgical and obstetric-gynecological patients; -Identify risk groups for complications during the inpatient phase in obstetric, gynaecological, therapeutic and surgical patients; <p>To be able to:</p> <ul style="list-style-type: none"> - Basic word processing on a personal computer for the processing of medical records, including digital records; - Properly maintaining the medical records of the obstetrical, gynaecological, therapeutic and surgical inpatient departments (forms 003-u; 025/u)
PC-5 willingness to collect and analyse	<p>Know:</p> <ul style="list-style-type: none"> -diagnostic methods, diagnostic possibilities of methods of direct

<p>patient complaints, anamnesis, examination, laboratory, instrumental, pathological-anatomical and other investigations in order to recognise the condition or to establish the presence or absence of a disease</p>	<p>examination of the patient of the therapeutic, surgical and obstetric-gynecological profile; -modern methods of clinical, laboratory, instrumental examination of patients (including endoscopy, radiology, ultrasound); Be able to: -Determine the patient's status: gather patient history, interview the patient and/or relatives, conduct physical examination of the patient (examination, palpation, auscultation); - Conduct an initial examination of the respiratory, cardiovascular, blood and haematopoietic, digestive, endocrine and urinary systems and organs; -Mark the scope of additional investigations according to the prognosis of the disease, in order to clarify the diagnosis and obtain a reliable result; To be able to: -Methods of general clinical objective examination (questioning, examination, palpation, percussion, auscultation) for diseases of internal organs; -Interpretation of the results of laboratory, instrumental diagnostic methods in internal organ pathologies</p>
<p>PC-6 - ability to identify patients' main pathological conditions, symptoms, disease syndromes, nosological forms according to the International Statistical Classification of Diseases and Related Health Problems, Revision X</p>	<p>Know: -modern classification of diseases; -The clinical picture, course and possible complications of the most common diseases typical of different age groups Be able to: -to make a preliminary diagnosis; -synthesise information about the patient in order to identify pathological conditions and their causes; -formulate a clinical diagnosis according to ICD X; -develop a therapeutic obstetric-gynecological and surgical plan of action and activities, taking into account diseases or conditions To be able to: -The algorithm for provisional, detailed clinical and final diagnosis in obstetric, gynaecological, therapeutic and surgical diseases; -an algorithm for differential diagnosis in obstetric, gynaecological, therapeutic and surgical pathologies</p>
<p>PC - 8 ability to determine the management of patients with different nosological forms</p>	<p>Know: -criteria for the diagnosis of various internal diseases; -An algorithm for managing a patient with various therapeutic, surgical, obstetric and gynaecological pathologies Be able to: - formulate indications for the chosen treatment, taking into</p>

	<p>account etiopathic, pathogenetic and symptomatic therapy; -Develop an algorithm for the management of the therapeutic, surgical, obstetric and gynaecological patients Know: algorithm for determining the management of the therapeutic, surgical and obstetric-gynaecological patient, differential diagnosis</p>
PC -10 - readiness to provide medical care for sudden acute illnesses, conditions, exacerbations of chronic diseases that are not life-threatening and do not require emergency medical care	<p>Know: The algorithm for the management of sudden acute illnesses, exacerbations of chronic diseases of the therapeutic, surgical and obstetric-gynecological profile in a 24-hour inpatient setting; -Indications for hospital admission; - indications for day hospital treatment; -Special features of the organisation and scope of work of a general practitioner in a medical, surgical and obstetric-gynaecological inpatient unit; -Methods of emergency intervention; -Indications for emergency hospitalisation of patients; -the clinical and pharmacological characteristics of the main groups of medicines and the rational choice of specific medicines in the treatment of emergencies</p> <p>Be able to:</p> <p>-To develop an algorithm for the management of therapeutic, surgical and obstetric-gynaecological patients in hospital conditions;</p> <p>-Keep the selection of patients for inpatient management;</p> <p>-Assist in sudden acute illnesses, exacerbations of chronic diseases in the therapeutic, surgical and obstetric-gynecological fields;</p> <p>-Evaluate the surgical patient's condition in order to decide on the need for emergency medical care; formulate a clinical diagnosis; set priorities for dealing with the patient's health problems; select an individual type of care to treat the patient in the appropriate situation (primary care, emergency care, hospitalisation);</p> <p>-formulate indications for the chosen treatment method, taking into account pathogenetic and etiopathic agents;</p> <p>-justify pharmacotherapy in a specific patient for the main pathological syndromes and emergencies, determine the route of administration, regime and dosage of drugs, assess the effectiveness and safety of the treatment</p> <p>To be able to:</p> <p>-algorithm for determining the management of therapeutic pathology in an inpatient setting;</p> <p>-the fundamentals of nursing care in hospital settings;</p> <p>-The algorithm of care for sudden acute illnesses, acute exacerbations of chronic diseases in therapeutic, surgical, obstetrical and gynaecological fields</p> <p>-algorithm for a detailed clinical diagnosis;</p>

	Basic medical diagnostic and treatment measures for emergency and life-threatening conditions
PC-11 - willingness to participate in emergency medical care for conditions requiring urgent medical intervention	<p>Know: the main causes of conditions requiring urgent medical intervention in obstetrics, gynaecology, therapy and surgery, their differential diagnosis, as well as the tactics for emergency medical care for such conditions</p> <p>Be able to: provide emergency medical care for conditions requiring urgent medical intervention in obstetric-gynecological, therapeutic and surgical practice</p> <p>Know: algorithms for emergency obstetric, gynaecological, therapeutic and surgical emergency care</p>
PC-12 - preparedness for managing a physiological pregnancy, childbirth	<p>Know: how to determine the age of pregnancy and childbirth, the course of physiological pregnancy and childbirth; procedures for medical care in obstetrics and gynaecology and the federal clinical guidelines for the management of physiological pregnancy and childbirth</p> <p>To be able to: under the guidance of a doctor, develop a plan for labour and delivery, taking into account the course of pregnancy, labour and the condition of the intrauterine fetus</p> <p>Know: algorithm for the management of physiological pregnancy and birth in the occiput presentation, according to the care guidelines and federal clinical guidelines</p>
PC-13 - willingness to participate in medical assistance in emergencies, including participation in medical evacuations	<p>Know: regulatory documents "Order of emergency medical care according to the orders of the Ministry of Health of Russia and the orders of the regional health authorities. List of indications for admission to Level III inpatient obstetric units; absolute contraindications to medical evacuation.</p> <p>Be able to: Determine whether the patient is transportable or not. In medical evacuation, work with the doctor to determine which group the patient can be assigned to and how to ensure maximum safety.</p> <p>Know: algorithms for emergency treatment of cardiac arrest, arrhythmia, TELA, bleeding, eclampsia, coma, etc., in accordance with the care order and federal clinical guidelines.</p>
PC-14-readiness to determine the necessity of natural healing factors, medicinal, non-medicinal therapy and other methods in patients in	<p>Know:</p> <ul style="list-style-type: none"> -Criteria for the applicability of natural healing factors, and other methods of medical rehabilitation for various internal diseases; -prescription algorithm for natural healing factors and other non-pharmacological treatments for various therapeutic, surgical,

need of medical rehabilitation and sanatorium treatment	obstetric and gynaecological pathologies Be able to: <ul style="list-style-type: none"> - formulate indications for the chosen treatment, taking into account etiopathic, pathogenetic and symptomatic therapy; - Develop an algorithm for the provision of natural factors and non-medicinal therapeutic methods to patients in the therapeutic, surgical, obstetrical and gynaecological fields Know: <p>algorithm for determining the tactics of therapeutic, surgical and obstetric-gynaecological patient management, when using the techniques of rehabilitation of patients and treatment in sanatorium-resort conditions</p>
---	--

4. LOCATION AND TIMING OF THE PRACTICE

Work practice is carried out on the clinical bases of IMEFK UlsU - in medical and preventive institutions of Ulyanovsk region. Clinical bases have the necessary staff and scientific and technical potential, meeting the requirements of FSES VO 3+. The main activities of medical and preventive institutions provide facilities and professional activities for graduates in the specialty "31.05.01 General Medicine".

The practice "Hospital Assistant" in obstetrics, gynaecology, therapy and surgery takes place on the bases:

- Regional Clinical Hospital No.1 Ulyanovsk, 20, ul.
- Central Clinical Sanitary Unit Ulyanovsk, 12 Likhacheva St.
- Central City Clinical Hospital Ulyanovsk, 27 Orenburgskaya Street
- Ulyanovsk Regional Clinical Centre for Specialised Medical Care 30, Ryleeva Street, Ulyanovsk
- Ulyanovsk Regional Hospital for War Veterans, 26 Kuznetsova Street, Ulyanovsk
- UOCDP Perinatal Centre "Mama", 48 Radischeva St., Ulyanovsk
- City Clinical Hospital No.1, 4 Vracha Surova Ave., Ulyanovsk

A part of practical skills is preliminarily mastered in the simulation class of IMEFKU before the distribution of students to clinical bases. The practical training is carried out under the direct supervision of the staff of the Department of Obstetrics and Gynaecology, Department of Faculty Surgery, Department of Faculty Therapy.

Dates of the practice, according to the timetable: Semester 8.

5. TOTAL WORKLOAD OF THE PRACTICE

Scope of practice		Duration of practice
s.e.	watch	of the week
6	216	4

5.1 Scope of the discipline in credit units (total) Z216ET/hours6

5.2 The practice duration is 4 weeks

5.3. Discipline volume by type of work (in hours)

Type of study semesters	Number of hours (for each form of study: full-time/part-time/part-time, fill in a separate table)		
	Total according to plan	Including by semester No. 7 semester	No. 8 semester
1	2	3	4
Classroom activities:	4	-	4
- lectures	4	-	4
- practical work	204	-	204/102*
- Laboratory work (laboratory practice)	-	-	-
Independent work	-	-	-
Form of current knowledge control and control of independent work: testing, quiz, colloquium, abstract, etc. (at least 2 types)	-	-	-
Coursework	-	-	-
Types of midterm assessment: differential credit	8	-	8/4*
Total hours in the discipline	216	-	216/106*

* - Number of hours of work of the teaching staff with learners in a distance learning format with the use of e-learning.

6. STRUCTURE AND CONTENT OF THE PRACTICE

Nº n/a	The sections (stages) of the practicum	Types of practical work, including students' independent work	Labour input (in hours)	Forms of ongoing monitoring
1.	Organisation of work in obstetric-gynecological, therapeutic and surgical departments	Conducting an organisational and methodological meeting with the students, preparing them for their summer practice. The preparatory stage includes a safety induction. Allocation of streams to departments. Drawing up a schedule of work and duties. Getting to know all the units of the hospital. Allocation of tasks for independent work.	2	An entry in the attendance log. Personal signature in the safety briefing book Practice diary
2		Lecture: Preventing HIV infection in the hospital setting.	4	Recording in the attendance log
3.	Simulation room	Practical skills training on maternity, obstetric,	20	Practice diary

		gynaecological, therapeutic and surgical simulators		
4.	Treatment and preventive care for the adult population in obstetric-gynaecological, therapeutic and surgical in-patient departments	1. Initial examination of patients, maintenance of medical records (under the supervision of a doctor). 2. Daily follow-up of patients under the supervision of the resident physician of the ward, the ward manager and the practice manager. 3. Maintaining medical records (case histories, staging and discharge epicrisis, treatment diaries). 4. Presence in operating theatres: working in the operating theatre, assisting in operations; carrying out dressings, medical manipulations, drainage. Filling in surgical protocols. 5. Health education - talking to patients on a daily basis or producing a health bulletin. 6. Drawing up practice diaries	54	Practice diary
5.	Working in the functional diagnostic departments	Participation in diagnostic tests and functional tests, interpretation of test results, maintenance of medical records under the supervision of a doctor. Participation in ultrasound, CT and MRI examinations.	56	Practice diary
6.	Providing emergency care for patients in inpatient settings	.Provide emergency care in the emergency rooms. Participate in intensive care units. Drawing up a list of medicines for emergency care. Preparing medical records.	34	Practice diary
7.	Research work	Writing an essay	22	Summary
8.	Summing up	1. completing the practice diary. 2. Interview for the differential credit	16 8	Practice diary Questions for credit
9.		Total:	216	

7. RESEARCH AND PRODUCTION TECHNOLOGIES USED IN PRACTICE

The student's research work is aimed at integrated formation of general professional and vocational competences in accordance with the requirements of FSES 3+ (2016)

In this section of the training, students can

- study special medical literature and other scientific and technical information on the

9 из 28

achievements of domestic and foreign science and technology in the field of medical knowledge (see list of references), draw up an abstract;

- Participate in scientific research (students are members of the department's student research circle);
- collect, process, analyse and systematise scientific and technical information on the topic (assignment).

8. FORM OF INTERIM ASSESSMENT OF THE PRACTICE

The student's work in the clinic is supervised by the department supervisor, the attending physician and the head of department. Current supervision is carried out by the resident doctor, head of department and the supervisor of the department responsible for the practice. Control includes joint rounds of patients, discussion of the results of the examination of the patient, prescription of treatment, checking the correctness and regularity of completion of the practice diary.

The diary is written daily and signed and personally stamped by the doctor or practice manager from the LPU, while the report and description are certified by the Deputy Head Physician for the therapeutic section of the LPU. At the end of the practice, the diary, practice report and the description of the Head of Practice of a medical institution shall be certified by the seal of the medical institution.

At the end of each daily diary entry, the student records the number of practical manipulations and skills performed during the day and the degree of mastery - observed, participated or performed independently (under the doctor's supervision).

Separate entries in the diary are made *on the duty report*, the date of which must fully correspond to the schedule of the practice, certified by the signatures of the Department Supervisor and the Deputy Chief Medical Officer of the treatment unit of the hospital. In the "Individual task" section, the subject of the SRI (abstract) must be filled in.

The supervisor supervises the students' work by assessing the accuracy of the diary, medical records, knowledge of ICD-X, clinical classifications, standards of care, clinical guidelines, clinical skills and thinking of the students, health education and mastery of practical skills.

The professional and personal qualities of the student, the level of mastering skills and abilities, and his/her communication data are noted by the attending physician or the head of practice of the LPU on the last day of the practice. The description shall be signed and stamped by the deputy chief physician of the LPU or the head of the hospital department of surgical, therapeutic, obstetric and gynaecological profile.

The practice report in the practice diary is filled in at the end of the practice and presents numerical data in the form of a summary of

tables of mastered practical skills with an indication of the number of manipulations performed (in total during the practice period) and the degree of their mastery - attended (observed), participated, performed independently (under the supervision of a doctor). The report must be signed personally by the student, the deputy chief physician for the treatment part of the LPU and the supervisor of the department. Signatures must have transcripts. The report shall be certified by the seal of the LPU.

The final credit for the practical training shall be awarded on the last day of the training according to the approved timetable communicated to the students. Only students who have mastered the recommended list of practical manipulations and have submitted a diary and an abstract shall be allowed to pass the exam.

The results of the differential assessment are graded on a 4-point scale - "excellent", "good", "satisfactory" or "unsatisfactory".

The results of the examination are recorded in the report card.

Upon completion of the practice, the head of the department draws up the practice report and submits it to the basic practice supervisor at Ulyanovsk State University.

10. LOGISTICAL SUPPORT FOR THE PRACTICE

Classrooms for lectures, seminars, current and interim assessments, group and individual consultations.

The classrooms are equipped with specialised furniture, a blackboard and multimedia equipment to provide information to large audiences, tables, samples of documentation of the district doctor and MSE, slides, filmstrips, videos, presentations and educational boards.

Equipment: computers, multimedia projector, set of obstetric instruments, phantoms, dolls, simulator manikin "Zoya" (GD/F56 highly intelligent digital system-simulator of obstetric and gynaecological skills controlled by computer) with uterus and newborn manikin (simulation class), perineum phantom (simulation class), USG device "Aloka-500", colposcope, hysteroscope, phonendoscopes, apparatus for measuring blood pressure, ECG device Poly-Specl-8/EX (12-channel miniature wireless electrocardiograph), device for daily monitoring of blood pressure, ultrasound machine "Toshiba Aplio 300".

The list of equipment used in the educational process is indicated in accordance with the information on the material and technical support and equipment of the educational process posted on the official website of UlGU in the section "Information about the educational organisation".

11. SPECIAL FACILITIES FOR LEARNERS WITH DISABILITIES AND IMPAIRMENTS

Students with disabilities and persons with disabilities practise together with other students (in a study group) or individually (on the student's personal application).

Determination of places of practical training for students with disabilities is carried out taking into account the state of health and accessibility requirements for this category of students. When determining the places and conditions (taking into account the nosological group and disability group of the student) of training and practical training for this category of persons, the individual characteristics of students, as well as the recommendations of medical and social expert assessment, reflected in the individual rehabilitation programme, regarding the recommended conditions and types of work.

When determining the place of practice for students with disabilities, special attention is paid to work safety and the equipment of the workplace. Practicum workplaces are provided by the relevant organisation in accordance with the following requirements:

- **For students with disabilities and visually impaired students:** provision of a special workplace with general and local lighting to ensure that the student can easily find his or her workplace and perform individual tasks; availability of video magnifiers, magnifying glasses;
- **for learners with disabilities and the visually impaired-blind:** equipping the special workplace with typhlo-technical landmarks and devices, with the possibility of using large relief-contrast font and Braille, acoustic navigation aids to ensure that the person can easily find his or her workplace and perform individual tasks;
- **For students with disabilities and hearing-impaired people:** equipping a special workplace with sound-amplifying equipment and telephones for the hearing-impaired;
- **For students with disabilities and the deaf and hearing impaired:** equipping a special workplace with visual indicators that convert audio signals into light, speech signals into a text ticker, to allow the person to easily find his or her workplace and perform individual tasks;
- **for students with disabilities and persons with mobility impairments:** equipment

that ensures the implementation of ergonomic principles (the most convenient arrangement of the workplace for persons with disabilities); mechanisms and devices that allow changing the height and inclination of the work surface, the height and inclination of the work chair seat, the angle of inclination of the work chair back; equipment with a special seat that provides compensation for effort when standing, special devices for operating and servicing

Conditions for the organisation and carrying out of the practice, preparation of reporting materials, current monitoring and interim certification of the practice are provided in accordance with the following requirements:

- The volume, pace and forms of individual assignments for the practice period are set individually for each trainee in these categories. Depending on the nosology, the contraindicated loads (visual, sound, muscular, etc.) are reduced as much as possible.
- The practice teaching and learning materials are presented in various forms so that students with disabilities and persons with hearing impairments receive information visually (practice documentation is printed in large print; videos and visual materials on the content of the practice are provided), visually impaired visually (for example, using speech synthesis software) or with the help of visually-impaired devices.
- The form of current and interim assessment for students with disabilities is determined taking into account the individual psychophysical characteristics (verbal, written, computer assisted, testing, etc.). If necessary, the student is given additional time to prepare a response and/or to defend the report.
