F – Educational program of the practice of HE (specialty)		

1. GOALS AND OBJECTIVES OF PRACTICE

Aim of the Course: the formation and consolidation of general professional and professional competencies, the study of the organization of work of an outpatient clinic, the mastery of the main activities of a general practitioner, surgeon, obstetrician-gynecologist of an outpatient institution.

Practice tasks:

- Familiarize yourself with the structure of the outpatient facility;
- Familiarize yourself with the principles of precinct and medical examination;
- To study the organization of work of outpatient care to the population (in a clinic, department of general practice);
- To study the functional responsibilities of a doctor working in a clinic;
- To study the tactical, legal and organizational issues of the work of the doctor of the outpatient institution, including during the dispensary observation;
- Master the use of various rehabilitation measures;
- Examine the indications for surgical treatment;
- To get acquainted with the regulatory documentation of an outpatient institution, to acquire the skills of its design;
- To acquire practical skills and abilities to provide outpatient care to the population, including primary and secondary prevention;
- Master the technique of emergency care for patients at the prehospital stage.

2. PLACE OF PRACTICE IN THE STRUCTURE OF BASIC PROFESSIONAL EDUCATIONAL PROGRAM

“Practice for obtaining professional skills and experience of professional activities (Physician assistant of an outpatient clinic)” refers to the production practice.

Requirements for the input knowledge, skills and competencies of students needed to study the discipline are formed:

- in the study of the disciplines: philosophy, bioethics, history of medicine, psychology and pedagogy, jurisprudence Latin;

- when studying the disciplines: physics and mathematics; medical informatics; chemistry; biology; biochemistry; human anatomy; topographic anatomy; pathological anatomy; clinical pathological anatomy; histology, embryology, cytology; normal physiology; pathophysiology; microbiology, virology; pharmacology; immunology;

- when studying the disciplines: hygiene; public health and healthcare, health economics; epidemiology; medical rehabilitation; clinical pharmacology; propaedeutics of internal diseases; faculty therapy; dermatovenerology; general surgery, surgical diseases; pediatrics; radiation therapy and radiation diagnostics, infectious diseases, phthisiopulmonology, outpatient therapy, occupational diseases, ophthalmology, obstetrics and gynecology, ENT diseases, hospital therapy, endocrinology, anesthesiology, intensive care, intensive care, oncology, traumatology, outpatient therapy;

Ministry of Science and High Education of RF Ulyanovsk State University Medical faculty of T.Z. Biktimirov, IMEiPC	Form	
F – Educational program of the practice of HE (specialty)		

- various types of practices after 1-4 courses: care for therapeutic and surgical patients, assistant nurses, assistant wards, assistant treatment nurse, assistant hospital doctor.

3. LIST OF PLANNED LEARNING RESULTS WHEN TRAINING PRACTICES OF STUDENTS RELATED TO THE PLANNED RESULTS OF DEVELOPMENT OF BASIC PROFESSIONAL EDUCATIONAL PROGRAM

As a result of practical training “Assistant doctor of an outpatient clinic”, the following competencies are formed: OPC-6, PC-2, PC-3, PC-4, PC-5, PC-6, PC-7, PC-8, PC-9, PC-10, PC-17, PC-18, PC-19.

Competency Index and Name	List of planned internship outcomes related to competency indicators
OPC-6	<p>Know:</p> <ul style="list-style-type: none"> -Bases of the organization of outpatient care to various population groups; -principles of medical examination of rehabilitation of patients with a therapeutic, therapeutic and obstetric-gynecological profile; <p>Be able to:</p> <ul style="list-style-type: none"> - fill in the basic medical documentation (form 025 / y, 027-028 / y, 046 / y, 039 / y, 070 / y, 088 / y, 030 / y, form 113special., 096 / y); -Determine groups for referral to the rehabilitation of patients with a therapeutic, surgical and obstetric-gynecological profile - identify risk groups for complications during pregnancy, childbirth and the postpartum period <p>Own: proper management of medical documentation of an outpatient institution (form 025 / y, 027-028 / y, 046 / y, 039 / y, 070 / y, 088 / y, 030 / y, form 113 special., 096 / y)</p>
PC-2	<p>To be able to: fill out the basic medical documentation for the implementation of preventive medical examinations, clinical examination and the implementation of clinical supervision.</p> <p>Own: the correct management of medical documentation for the implementation of preventive medical examinations, clinical examination and the implementation of clinical supervision</p>
PC-3	<p>Know: the epidemiology of especially dangerous infections, HIV infection, infectious diseases; rules for conducting anti-epidemic measures,</p> <p>To be able to: detect in a patient signs of especially dangerous infections, HIV infection, contagious infectious diseases; carry out anti-epidemic measures, assist the population in the outbreak with a particularly dangerous infection, contagious infectious diseases, HIV infection; provide assistance to the population in places</p>

F – Educational program of the practice of HE (specialty)		

	indicators to assess the quality of medical care Own: basic skills of medical statistics
PC-19	Know: the principles of organization of medical care in emergency situations, including medical evacuation To be able to: correctly and timely provide assistance in an emergency in accordance with the type and extent of the emergency Own: emergency knowledge and skills

4. PLACE AND DURATION OF PRACTICE

Industrial practice is carried out at the clinical bases of IMEFC UISU - in medical institutions of the Ulyanovsk region. Clinical bases have the necessary human and scientific and technical potential. The main activity of medical institutions provides facilities and professional activities for graduates in the field of training specialty 05.31.01 " General Medicine".

Production practice "Assistant doctor of an outpatient clinic" obstetric, gynecological, therapeutic, surgical profile is held at the following bases:

- State Health Institution “City Polyclinic No. 1 IM. CM. Kirov ", Ulyanovsk, st. Gagarina, d.20
- State Health Institution “Central Clinical Medical Unit”, Ulyanovsk, ul. Likhacheva, 12
- State Institution “Central City Clinical Hospital”, Ulyanovsk, Orenburgskaya St., 27
- State Institution “Ulyanovsk Regional Clinical Center for Specialized Types of Medical Care” Ulyanovsk, ul. Ryleyeva 30
- State Health Institution “City Polyclinic No. 4”, Ulyanovsk, ul. Kamyshinskaya , house 41
- State Institution “City Clinical Hospital No. 1”, Ulyanovsk, Prospect VrachaSurova, 4

A part of practical skills is preliminarily mastered in the simulation class of IMEFC UISU before the distribution of students to clinical bases. Industrial practice is carried out with direct supervision by the staff of the Department of Obstetrics and Gynecology, Department of Hospital Surgery, Anesthesiology, Intensive Care, Urology, Traumatology, Orthopedics, Department of Therapy and Occupational Diseases.

Dates of practical training, in accordance with the calendar training schedule.

5.TOTAL LABOR INTENSITY OF PRACTICE

Scope of practice		Duration of practice
credit unites	hour	weeks
6	216	4

*If it is necessary to use partly distance educational technologies in the educational process, the organization of work with students with disabilities and disabled people is provided in the electronic information and educational environment, taking into account their individual psychophysical characteristics.

6. STRUCTURE AND CONTENT OF PRACTICE

		Participation in the conduct of prof. inspections. The study of regulatory documents for the medical examination. Conducting sanitary-educational activities (lectures on a healthy lifestyle). Filling outpatient cards based on the results of dispensary examinations. Acquaintance with dispensary observation logs. Conducting conversations with patients about risk factors.			
4	The provision of emergency care to patients at the prehospital stage.	Providing emergency care at home. Participation in the work of the day hospital ward. Drawing up a list of medicines for emergency care.	thirty	24	Practicediary, abstract
5	Researchwork	Abstractwriting	9	3	abstract
6	Summarizing	Set-offinterview	18	18	Practicediary, abstract

7. SCIENTIFIC RESEARCH AND SCIENTIFIC PRODUCTION TECHNOLOGIES USED ON PRACTICE

The student's research work is aimed at the integrated formation of general professional and professional competencies.

In this section of the study, students can:

- study special medical literature and other scientific and technical information on the achievements of domestic and foreign science and technology in the medical field of knowledge (see the list of references), draw up an abstract;
- participate in scientific research (students - members of the student's scientific circle of the department);
- collect, process, analyze and systematize scientific and technical information on a topic (task).

Ministry of Science and High Education of RF UlyanovskStateUniversity Medical faculty of T.Z. Biktimirov, IMEiPC	Form	
F – Educational program of the practice of HE (specialty)		

8. FORM OF INTERMEDIATE ATTESTATION BY RESULTS OF PRACTICE

Interim certification based on the results of practice is carried out in the form of a differentiated classification.

Differentiated classification is carried out on the basis of monitoring the implementation of individual tasks by observing the student's activities during the internship, analyzing documents confirming that he completed all tasks in accordance with the PP, evaluating the formation of all competencies for this type of practice, using the FSF in practice.

The student's activity in the clinic is controlled by the curator of the department, the attending physician and the head of the department. Current control is carried out by a doctor, intern, department head and curator of the department, responsible for the practice. The control includes joint rounds of patients, discussion of the results of a patient examination, treatment appointment, analysis of the practice diary. The practice diary is a document confirming that students complete all tasks in accordance with the practice program.

According to the results of the differentiated classification, a mark is set on a 4-point scale - "excellent", "good", "satisfactory" or "unsatisfactory".

According to the results of certification, a mark is put in the final statement.

Upon completion of practical training, the head of practice from the department draws up a report on the practice and submits it to the base manager of practical training at UISU .

11. SPECIAL CONDITIONS FOR STUDENTS WITH DISABILITIES OF HEALTH AND DISABLED

Students with disabilities and people with disabilities practice together with other students (in the study group) or individually (according to the student's personal statement).

The determination of practice places for students with disabilities and for persons with disabilities is carried out taking into account the state of health and the requirements for their availability for this category of students. When determining places and conditions (taking into account the nosological group and the student's disability group) undergoing training and practical training for this category of people, the individual characteristics of the students are taken into account, as well as the recommendations of the medical and social examination reflected in the individual rehabilitation program, regarding the recommended working conditions and types.

In determining the place of practice for students with disabilities and persons with disabilities, special attention is paid to occupational safety and the equipment (equipment) of the workplace. Workplaces for practice are provided by a specialized organization in accordance with the following requirements:

- **for students with disabilities and visually impaired - visually impaired:** equipping a special workplace with general and local lighting, ensuring that the indicated person can freely find their workplace and perform an individual task; the presence of video enhancers, loops;

- **for students with disabilities and visually impaired - blind:** equipping a special workplace with typhlotechnical landmarks and devices, with the possibility of using a large relief and contrast font and Braille, with acoustic navigation aids that ensure that the indicated person can freely find their workplace and carry out an individual task;

- **for students with disabilities and hearing impaired - hearing impaired:** equipping a special workplace with sound amplifying equipment, telephones for the hearing impaired;

- **for students with disabilities and hearing impaired - deaf:** equipping a special workplace with visual indicators that convert sound signals into light, speech signals in a text running line, for the indicated person to freely find his workplace and perform an individual task;

- **for students with disabilities and disabled people with impaired function of the musculoskeletal system:** equipment that ensures the implementation of ergonomic principles (the most convenient arrangement for the disabled person of the elements making up the workplace); mechanisms and devices that allow you to change the height and tilt of the working surface, the position of the seat of the working chair in height and tilt, the angle of inclination of the back of the working chair; equipping with a special seat, providing compensation of effort when standing up, with special devices for managing and servicing this equipment.

The conditions for organizing and passing practice, preparing reporting materials, conducting current control and intermediate certification of practice are provided in accordance with the following requirements:

- The volume, pace, forms of performing an individual task for the period of practice are set individually for each student of the indicated categories. Depending on nosology, contraindicated (visual, sound, muscle, etc.) loads are minimized.

- Training and teaching materials for practice are presented in various forms so that students with disabilities and people with hearing impairments receive information visually (practice documentation is printed in large print; video materials and visual materials on the contents of the practice are provided), audually impaired (for example, using speech synthesizer programs) or using tifloinformation devices.

- The form of conducting current monitoring of academic performance and intermediate certification for students with disabilities and for persons with disabilities is established taking into account individual psychophysical characteristics (verbally, in writing,

Ministry of Science and High Education of RF Ulyanovsk State University Medical faculty of T.Z. Biktimirov, IMEiPC	Form	
F – Educational program of the practice of HE (specialty)		

using a computer, in the form of testing, etc.). If necessary, the student is given extra time to prepare an answer and (or) protect the report.

*If it is necessary to use partly distance educational technologies in the educational process, the organization of work with students with disabilities and disabled people is provided in the electronic information and educational environment, taking into account their individual psychophysical characteristics.
