F-Program of practical training during practice		

## 1. PURPOSE AND OBJECTIVES OF PRACTICE

**The objectives of the internship:** the formation and consolidation of general professional and professional competencies, obtaining the theoretical foundations of the organization of the hospital work, mastering the main activities of a hospital doctor.

### Practice tasks:

1. To get acquainted with the structure and organization of work of hospitals of a therapeutic, surgical and obstetric-gynecological profile;
2. To get acquainted with the main indicators of the hospital's activity, the regulatory documents governing the work of the medical facility;
3. To study the functional duties of a doctor working in a hospital environment;
4. To study tactical, legal and organizational issues of the work of a hospital doctor;
5. Mastering the main stages of treatment-diagnostic, rehabilitation and preventive work with patients in a hospital setting, in the process of independent medical activity under the control and correction of it by a teacher.
6. To master the conduct of sanitary and educational work among patients.

During the course of educational practice, all theoretical knowledge, skills and abilities acquired by students in the study of clinical disciplines of a therapeutic profile in the classroom throughout the academic year at the departments of obstetrics-gynecology, faculty therapy and surgery should be used, concretized and replenished (7-8 semesters) .

## 2. PLACE OF PRACTICE IN THE STRUCTURE OF OPOP

" **Practice for obtaining primary professional skills and abilities of a doctor in an inpatient institution** " refers to a mandatory part of educational practice B2.O.10 (U) and takes place in the eighth semester in accordance with the Federal State Educational Standard of Higher Education and the Working Curriculum of the specialty 31.05.01 "General Medicine", approved by the rector Ulyanovsk State University (Order No. 988 dated 08/12/2020).

Requirements for the input knowledge, skills and competencies of students necessary for studying the discipline are formed:

-when studying the disciplines of the humanitarian, social and economic cycle: philosophy, bioethics, history of medicine, psychology and pedagogy, jurisprudence Latin;

-when studying the disciplines of the mathematical, natural science cycle: physics and mathematics; medical informatics; chemistry; biology; biochemistry; human anatomy, topographic anatomy; pathological anatomy, clinical pathological anatomy; histology, embryology, cytology; normal physiology; pathophysiology; microbiology, virology; pharmacology; immunology;

- when studying disciplines of the professional cycle: hygiene; public health and health care, health economics; epidemiology; medical rehabilitation; clinical pharmacology; propedeutics of internal diseases; faculty therapy; dermatovenerology; general surgery, surgical diseases; pediatrics; radiation therapy and radiation diagnostics, infectious diseases, phthisiopulmonology, polyclinic therapy, occupational diseases, ophthalmology, obstetrics and gynecology, ENT diseases, hospital therapy, endocrinology, anesthesiology, resuscitation, intensive care, oncology, traumatology, polyclinic therapy;

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	The form	
F-Program of practical training during practice		

- various types of practices after 1-3 courses: caring for therapeutic and surgical patients, assistant nursing staff, assistant ward nurse, assistant procedural nurse.

The study of the section is preceding for the disciplines: hospital therapy, endocrinology; infectious diseases; ph tiziatory; n polyclinic therapy. Practice is the previous section for the state final certification of students.

### LIST OF PLANNED LEARNING OUTCOMES DURING THE TRAINING OF STUDENTS, CORRELATED TO THE PLANNED RESULTS OF THE EDUCATIONAL PROGRAM IMPLEMENTATION

As a result of the practical training "Physician Assistant of an inpatient institution", the following competencies are formed: OPK1, PC4, PC5.

Index and name of the implemented competence	List of planned results of internship, correlated with indicators of achievement of competencies
<b>OPK -1</b> Able to implement moral and legal norms, ethical and deontological principles in professional activities	<p><b>Know :</b> the relationship "doctor - patient" , "doctor - relatives" ; moral and ethical norms , rules and principles of professional medical behavior , the rights of the patient and the doctor ; basic ethical documents of international and domestic professional medical associations and organizations .</p> <p><b>Be able to :</b> protect the civil rights of doctors and patients of different ages ; apply techniques and techniques of effective communication in professional activities ; use the techniques of self-regulation of behavior in the process of interpersonal communication .</p> <p><b>Own :</b> methods of effective communication in professional activities ; methods of self-regulation of behavior in the process of interpersonal communication .</p>
<b>PC -4</b> Ready for determining the need to use natural healing factors , drug , non-drug therapy and other techniques in patients , in need of medical rehabilitation and sanatorium - resort treatment	<p><b>Know:</b> ways of administering drugs to patients with various diseases in need of medical rehabilitation and spa treatment.</p> <p>-criteria the applicability of natural healing factors, and other methods of medical rehabilitation for various diseases of internal organs;</p> <p>-algorithm for prescribing natural therapeutic factors and other non-drug methods of treatment with various therapeutic, surgical, obstetric and gynecological pathologies</p> <p><b>Be able to:</b> apply various methods of administering drugs to patients with various diseases in need of medical rehabilitation and spa treatment.</p> <p>- to formulate indications for the chosen method of treatment, taking into account etiotropic, pathogenetic and symptomatic therapy;</p>

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	The form	
F-Program of practical training during practice		

	<p>- to develop an algorithm for the provision of natural factors, methods of non-drug medical care for patients in inpatient institutions;</p> <p><b>Possess: the skills</b> of using different methods of drug administration in a sanatorium-resort environment in patients in need of medical rehabilitation and spa treatment.</p>
<p><b>PC - 5</b> The ability and willingness to implement a package of measures aimed at preserving and improving the health and includes the formation of a healthy lifestyle, the prevention of occurrence and (or) the spread of diseases, their early diagnosis, identification of the causes and conditions of their emergence and development, as well as aimed at eliminating the harmful effects of environmental factors on human health</p>	<p><b>Know : the</b> technique of wet cleaning of premises, ventilation of chambers, the technique of current and final disinfection; methods and methods of sanitizing patients in the admission department; - the method of treatment of patients with head lice; methodology for conducting anthropometry; dietary tables and their importance in therapeutic measures for the recovery of patients; blood pressure measurement technique; the method of studying the pulse on the arteries and its properties; method of counting respiratory movements.</p> <p><b>Be able to :</b> carry out wet cleaning of chambers, current and final disinfection; to carry out sanitization of the patient in the admission department; conduct anthropometry; count the respiratory movements and evaluate the result; measure blood pressure; examine the pulse in the arteries and evaluate the result.</p> <p><b>Own : the</b> technique of wet cleaning of chambers, current and final disinfection; the method of sanitizing the patient in the admission department; methodology anthropometry; method of counting respiratory movements; method of measuring blood pressure; the method of studying the pulse on the arteries.</p>

#### 4. PLACE AND DATES OF THE PRACTICE

Industrial practice is carried out at the clinical bases of the IMEiPKuISU - in medical institutions of the Ulyanovsk region. Clinical bases have the necessary human and scientific and technical potential that meets the requirements of the Federal State Educational Standard of Higher Education. The main activity of medical institutions provides facilities and professional activities for graduates in the direction of training the specialty 05/31/01 "General Medicine".

The industrial practice "Assistant to the inpatient doctor" of obstetric-gynecological, therapeutic, surgical profile takes place at the bases:

- GUZ "Regional Clinical Hospital No. 1" Ulyanovsk, st. III International, 20
- GUZ "Central Clinical Medical and Sanitary Unit" Ulyanovsk, Likhachev st., 12
- GUZ "Central City Clinical Hospital" Ulyanovsk, Orenburgskaya st., 27
- GUZ "Ulyanovsk Regional Clinical Center for Specialized Types of Medical Care" Ulyanovsk, st. Ryleeva, 30

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	The form	
F-Program of practical training during practice		

- GUZ "Ulyanovsk Regional Hospital of War Veterans", Ulyanovsk, st. Kuznetsova, 26
- GUZ UOKDB Perinatal Center "Mama", Ulyanovsk, st. Radishcheva, 48
- GUZ "City Clinical Hospital No. 1", Ulyanovsk, Doctor Surov Ave., 4

Some of the practical skills and abilities are preliminarily mastered in the simulation class of the IMEiPKulSU before the distribution of students to clinical bases. The production practice is carried out under the direct supervision of the staff of the Department of Obstetrics and Gynecology, the Department of Faculty Surgery, and the Department of Faculty Therapy.

Terms of practical training, in accordance with the calendar training schedule: 8 semester.

### TOTAL EMPLOYMENT OF THE PRACTICE

Practice scope		Duration of practice
z.e.	watch	weeks
<b>3</b>	<b>108</b>	<b>2</b>

### STRUCTURE AND CONTENT OF THE PRACTICE

No. p/p	Sections (stages) of passing practice	Types of work in practice, including independent work of students	Labor intensity (in hours)	The amount of hours of contact work between a student and a teacher	Monitoring forms
1.	Organization of work in hospital departments	Organizational and methodological meeting. Acquaintance with moral, legal, ethical and deontological norms and principles in the professional activity of a doctor	2	2	Entry in the log of visits. Personal signature in the safety briefing journal. Practice diary
3.	Simulation class	Practicing practical skills on profile dummies	10	2	Practice diary
4.	Treatment- and prophylactic and sanitary-hygienic work in the conditions of hospital departments	1. Familiarization with the main elements of medical documentation (orders, standards for diagnosis and treatment of diseases; forms, case histories, stage and discharge epicrisis, supervision diaries). 2. Drawing up plans for therapeutic, diagnostic, rehabilitation and	42	4	Practice diary

		preventive measures under the supervision of a doctor of the hospital department, the head of the department and the head of the practice. 3. Sanitary educational work - talking with patients on a daily basis or drawing up a sanitary bulletin.			
5.	Work in rehabilitation departments	Participation in the conduct and interpretation of the results of treatment and rehabilitation programs, diagnostic tests and functional studies in a rehabilitation hospital.	22	2	Practice diary
7.	Research work	Abstract writing	14	2	abstract
8	Summarizing	1. Making a practice diary. 2. Interview on differential credit	8 8	-	Practice diary Test questions
9.		<b>Total:</b>	<b>108</b>	<b>12</b>	

### **SCIENTIFIC - RESEARCH AND SCIENCE - production technologies , used in practice**

The student's research work is aimed at the complex formation of general professional and professional competencies in accordance with the requirements of the Federal State Educational Standard of Higher Education.

In this section of training, students can:

- study special medical literature and other scientific and technical information about the achievements of domestic and foreign science and technology in the medical field of knowledge (see the list of references), draw up an abstract;
- participate in scientific research (students - members of the student scientific circle of the department);
- collect, process, analyze and systematize scientific and technical information on the topic (task).

### **8. FORM OF INTERMEDIATE CERTIFICATION ON THE RESULTS OF PRACTICE**

The student's work in the clinic is supervised by the department curator, the attending physician and the head of the department. The current control is carried out by a physician resident, head of the department and the curator of the department, who is responsible for practice. Control includes joint rounds of patients, discussion of the results of the patient's

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	The form	
F-Program of practical training during practice		

examination, prescribing treatment, checking the correctness and regularity of filling out the practice diary.

**The diary** is written daily and certified by the signature and personal seal of the doctor or the head of the practice from the health care facility, and the report and description - by the deputy chief physician for the medical part of the health care facility. At the end of the practice, the diary, the report on the practice and the characteristics of the head of the practice from the medical institution are certified by the seal of the medical institution.

At the end of each daily entry in the diary, the student reflects the number of practical manipulations and skills performed during the day and the degree of their mastery - observed, participated or performed independently (under the supervision of a doctor).

With separate entries in the diary, a **report on duty** is drawn up, the date of which must fully correspond to the schedule of the internship, certified by the signatures of the department curator and the deputy chief physician for the medical part of the healthcare facility. In the section "Individual task" it is necessary to fill in the topic of the research work (abstract).

The supervisor, when supervising the work of students, assesses the correctness of the diary, the maintenance of medical records, knowledge of ICD-X, clinical classifications, standards of medical care, clinical guidelines, clinical skills and thinking of students, conducting sanitary and educational work and mastering practical skills.

In the **final characteristic**, filled in on the last day of the internship, the attending physician or the head of the practice from the health care facility notes the student's professional and personal qualities, the level of mastering skills and abilities, his communication data. The characteristic with the date is endorsed with his signature and stamp of the medical facility by the deputy chief physician for the medical part of the medical facility or the head of the department of hospitals of the surgical, therapeutic, obstetric-gynecological profile.

**The report on industrial practice in the practice diary** is filled in according to the results of industrial practice, is a digital data in the form of a summary tables of mastered practical skills and abilities indicating the number of manipulations performed (total for the period of practice) and the degree of their development - attended (observed), participated, performed independently (under the supervision of a doctor). The report must be signed personally by the student, the deputy chief physician for the medical part of the medical facility and the curator of the department. Signatures must be decrypted. The report is certified by the seal of the healthcare facility.

**The final test with an assessment in industrial practice** is held on the last day of the internship according to the approved schedule brought to the attention of the students. Only students who have mastered the recommended list of practical manipulations, who have provided a diary and an abstract are allowed to take the test. Based on the results of the differentiated offset, a mark is given on a 4-point scale - "excellent", "good", "satisfactory" or "unsatisfactory".

Based on the results of the certification, a mark is put on the summary sheet.

Upon completion of the internship, the head of the internship from the department draws up a report on the internship and submits it to the base manager of the internship at UISU.

## 10. MATERIAL AND TECHNICAL SUPPORT OF PRACTICE

Auditoriums for lectures, seminars, monitoring and intermediate certification, group and individual consultations.

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	The form	
F-Program of practical training during practice		

The classrooms are equipped with specialized furniture, a blackboard and equipped with multimedia equipment to provide information to a large audience, tables, samples of documentation of the district doctor and ITU, slides, filmstrips, videos, presentations, training stands.

Equipment: computers, a multimedia projector, a set of obstetric instruments, phantoms, dolls, a simulator "Zoya" (GD / F56 highly intelligent digital system-simulator of obstetric and gynecological skills controlled by a computer) with dummies of the uterus and a dummy of a newborn (simulation class), a phantom of the perineum (simulation class), forearm phantom for the introduction of Implanon, ultrasound machine "Aloka-500", colposcope, hysteroscope, phonendoscopes, blood pressure measuring devices, ECG apparatus Poly-Specr-8 / EX (12-channel miniature wireless electrocardiograph), device for daily monitoring of blood pressure, ultrasound machine "Toshiba Aplio 300".

The list of equipment used in the educational process is indicated in accordance with the information about the material and technical support and equipment of the educational process, posted on the official website of UISU in the section "Information about the educational organization".

## 11. SPECIAL CONDITIONS FOR STUDENTS WITH DISABILITIES AND THE DISABLED

Students with disabilities and people with disabilities undergo practical training together with other students (in a study group) or individually (at the student's personal request).

Determination of places of internship for students with disabilities and disabled people is carried out taking into account the state of health and requirements for their accessibility for this category of students. When determining the places and conditions (taking into account the nosological group and the disability group of the student) for passing the educational and industrial practice for this category of persons, the individual characteristics of the students are taken into account, as well as the recommendations of the medical and social examination, reflected in the individual rehabilitation program, regarding the recommended conditions and types of work.

When determining the place of practice for students with disabilities and disabled people, special attention is paid to occupational safety and equipment (equipment) of the workplace. Workplaces for practice are provided by a specialized organization in accordance with the following requirements:

- **for students with disabilities and visually impaired people:** equipping a special workplace with general and local lighting, ensuring that the specified person can easily find his workplace and perform an individual task; the presence of video enlargers, magnifiers;
- **for students with disabilities and visually impaired people:** equipping a special workplace with typhlotechnical landmarks and devices, with the possibility of using a large relief-contrast font and Braille, acoustic navigation aids, ensuring that the specified person can easily find his workplace and perform an individual task;
- **for students with disabilities and hearing-impaired people:** equipping (equipping) a special workplace with sound-amplifying equipment, telephones for the hearing-impaired;

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	The form	
F-Program of practical training during practice		

– **for students with disabilities and hearing-impaired people:** equipping a special workplace with visual indicators that convert sound signals into light, speech signals into a text running line, for the specified person to find his workplace without hindrance and to complete an individual task;

– **for students with disabilities and disabled people with impaired functions of the musculoskeletal system:** equipment that ensures the implementation of ergonomic principles (the location of the elements that make up the workplace is most convenient for the disabled person); mechanisms and devices allowing to change the height and inclination of the working surface, the position of the seat of the working chair in height and inclination, the angle of inclination of the back of the working chair; equipping with a special seat that compensates for the effort when getting up, special devices for operating and maintaining this equipment.

The conditions for organizing and passing practice, preparing reporting materials, conducting current control and intermediate certification in practice are provided in accordance with the following requirements:

– The volume, pace, forms of completing an individual task for the period of practice are set individually for each student of the indicated categories. Depending on the nosology, contraindicated (visual, sound, muscle, etc.) loads are reduced as much as possible .

– Educational and teaching materials on practice are presented in various forms so that students with disabilities and hearing impaired people receive information visually (practice documentation is printed in enlarged type; video materials and visual materials on the content of the practice are provided), with visual impairments - audibly ( for example, using speech synthesizers) or with the help of typhloinformation devices.

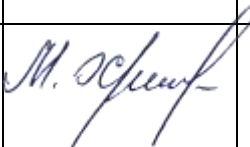

– The form of ongoing monitoring of progress and intermediate certification for students with disabilities and disabled people is established taking into account individual psychophysical characteristics (orally, in writing, using a computer, in the form of testing, etc.). If necessary, the trainee is given additional time to prepare a response and (or) protect the report.
