

APPROVED
 decision of the Academic council of institute
 medicine, ecology and physical education of UISU
 of June "22", 2020, protocol No. 10/220
 Chairman (V.I. Midlenko)
 "" 20 g.

WORKING PROGRAM

Discipline:	Quality management of medical care
Faculty	medical
Department:	Public health and health care
Course	VI

The direction (specialty) 31.05.01 " General medicine" (with development of a part of the program in English)

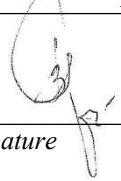

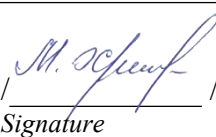

Internal form of education

Date of Introduction of the program in educational process of UISU: September "1", 2020.

- The program is updated at a faculty meeting: protocol №1 from 31.08.2021
- The program is updated at a faculty meeting: protocol №1 from 29.08 2022
- The program is updated at a faculty meeting: protocol №10 from 02.06. 2023
- The program is updated at a faculty meeting: protocol №10 from 22.05. 2024

Information about developers:

FULL NAME	Department	Position, academic degree, rank
V.I. Gorbunov.	Public health and health care	Department chair, MD, professor
G.V. Vozzhennikova.	Public health and health care	Associate professor, PhDs in Medicine., associate professor
I.N. Isaeva.	Public health and health care	Associate professor, PhDs in Medicine.

Agreed	Agreed
Head of department, developing discipline	Head of the graduating Department
 / <u>V.I. Gorbunov.</u> / Signature Full name <u>"22" 06 2020</u>	 / <u>Vize-Khripunova M. A.</u> / Signature Full name <u>"22" 06 2020</u>

1. PURPOSES AND PROBLEMS OF DEVELOPMENT OF DISCIPLINE "QUALITY MANAGEMENT OF MEDICAL CARE"

Purposes of development of discipline: to acquire necessary knowledge of issues of management and the organization of quality control of medical care

Problems of development of discipline:

- Studying theoretical bases of discipline "Quality management of medical care"
- Studying legal bases of ensuring quality of medical care
- Studying models of quality management of medical care in various health care systems
- Studying system of the organization of quality control of medical care

2. THE PLACE OF DISCIPLINE IN STRUCTURE OF GEP:

In compliance with the Curriculum the discipline "Quality management of medical care" belongs to a variable part of disciplines of specialty 31.05.01 "General medicine" of the higher professional medical education and is discipline for choice. It is studied in the Page semester.

Development of discipline is based on knowledge, skills formed by the previous disciplines: "Public health and health care", "Medical rehabilitation", "Hygiene", "Practice on obtaining professional abilities and experience of professional activity (medical assistant of out-patient and polyclinic establishment)".

The subject matter "Quality management of medical care" allows students to gain necessary knowledge, skills at development of the subsequent disciplines: "Epidemiology", "Modern questions of oncology", "Preparation for delivery and passing state exam".

3. LIST OF EXPECTED RESULTS OF INSTRUCTION ON THE SUBJECT (UNIT), CORELATED WITH PLANNED RESULTS OF COMPLETING THE PROGRAM

Code and name of implemented competences	The list of the planned results of training in discipline correlated to achievement indicators competences

5. CONTENT OF DISCIPLINE (MODULE)

Subject 1. Methods of the statistical analysis of health of the population and activity of healthcare institutions

Maintenance of a subject:

Health of the population and methods of its study. A role of indicators of health in assessment of quality of medical care. Organization of a statistical research on collection of information of indicators of health of the population. Incidence, technique of studying population morbidity. Technique of the analysis of indicators of activity of the medical organizations. Indicators of quality of medical care.

Subject 2. General characteristics and components of quality of medical care

Maintenance of a subject:

Definition of the concept "Quality of Medical Care". Characteristics of quality of medical care (A. Donabedian): effectiveness, efficiency, optimality, acceptability, legality, justice, impartiality. General characteristics of quality of medical care in modern health care: professional competence; availability; interpersonal relationship; efficiency; continuity; safety; convenience; compliance to expectations of patients. Components of quality of medical care: quality of structures (structural approach to providing and assessment); quality of technology (procedural approach to providing and assessment); quality of result (productive approach to providing and assessment).

Subject 3. Legal bases of ensuring quality of medical care

Maintenance of a subject:

Legislative and regulatory framework of ensuring quality of medical care. Constitution of the Russian Federation. (on December 12, 1993). Federal law of the Russian Federation No. 323-FZ of November 21, 2011 "About bases of protection of public health of the Russian Federation". Federal law of the Russian Federation No. 326-FZ of November 29, 2010 "About compulsory health insurance in the Russian Federation". Act of the Russian Federation "About Consumer Protection" of 7.02.1992. The rights of patients at delivery of health care. The main mechanisms of ensuring the rights of patients, a role of assessment of quality of medical care in ensuring the rights of insured.

Subject 4. Theoretical bases of quality management of medical care

Maintenance of a subject:

Quality management of medical care. Definition. Concept of "trilogy of quality" (E. Deming): quality planning, control of quality, improvement of quality. Models of management of process of ensuring quality of medical care: professional, bureaucratic, industrial. Control system of quality of medical care: committee on quality of MO; committee on quality of governing body of health care; interdepartmental committee on quality; non-staff expert of MZ and SR Russian Federation. Historical aspects of studying problems of assessment of quality of medical care.

Subject 5. Standardization in health care as the mechanism of quality management of medical care

Maintenance of a subject:

Concept of the standard of medical care. Assessment of quality of medical care on the basis of medico-economic standards. Standards on resources or structural approach to quality management of

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	Form	
F-Working program of the discipline		

medical care. Standards on processes or procedural approach to quality management of medical care. Standards on result or productive approach to quality management of medical care. Levels of medical standards (federal, regional, local). Clinical guides and protocols of maintaining patients. International experience of development of the quality standards of medical care.

Subject 6. Ensuring quality of medical care in MO

Maintenance of a subject:

Ensuring quality of medical care in medical institutions. The system of ensuring quality of medical services in the out-patient and polyclinic medical organizations. The system of ensuring quality of medical services in the stationary medical organizations. The economic analysis at assessment of quality of medical care.

Subject 7. Organization of quality control of medical care

Maintenance of a subject:

Method of expert evaluations. Method for determining coefficient of quality of delivery of health care. The main stages in carrying out expert assessment of quality of medical care the Analysis of quality and efficiency of medical care. Types of quality control of medical care. Departmental examination. Non-departmental examination. Independent auditor examination. Organization and carrying out internal (departmental) and external (non-departmental) quality control of medical care.

Subject 8. Assessment of quality of medical care

Maintenance of a subject:

Methods of assessment of volumes and quality of medical care. Statistical method. Method of expert evaluations of volumes and quality of medical services. Method of the medico-economic analysis. Sociological method. The complex (combined) method. Indicators of quality of medical care in MO: frequency of divergences of polyclinic and clinical diagnoses; frequency of defects (deviations) when performing diagnostics, treatment, rehabilitation, prevention. Coefficient of integrated assessment of quality of technological process (medical and diagnostic, preventive). Assessment of quality of medical care on model of the end results.

Subject 9. Licensing and accreditation of medical activity. Modern problems of quality of medical care.

Maintenance of a subject:

License. Purpose of licensing of medical activity. Legal and organizational technology of carrying out licensing. Order of obtaining license. Accreditation. Main objective of accreditation. Certification. Certification stages.

Ensuring availability and quality of medical care in modern health care. Basic reasons of dissatisfaction of patients with the provided medical care. The factors promoting improvement of quality of medical care. Policy in the field of health protection. Concept of improvement of quality of medical care. The problems of quality management of medical care requiring in the long term the solution.

6. SUBJECTS OF THE PRACTICAL TRAINING

Subject 1: Methods of the statistical analysis of health of the population and activity of healthcare institutions

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Health of the population and methods of its study.
2. Role of indicators of health in assessment of quality of medical care.
3. Incidence, technique of studying population morbidity.
4. Technique of the analysis of indicators of activity of the medical organizations.

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	Form	
F-Working program of the discipline		

5. Indicators of quality of medical care.

Questions for independent study

1. Organization of a statistical research on collection of information of indicators of health of the population.

Subject 2: General characteristics and components of quality of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Concepts "quality", "quality of medical care"
2. Characteristics of quality of medical care
3. Components of quality of medical care

Questions for independent study

1. The main characteristics of quality of medical care according to A. Donabedian: effectiveness, efficiency, optimality, acceptability, legality, justice, impartiality.

Subject 3: Legal bases of ensuring quality of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Basic laws of the Russian Federation and bylaws on problems of quality of medical care
2. Orders MZ Russian Federation on a control system of quality of medical care
3. Orders and standards of medical care

Questions for independent study

1. The rights of the patient when receiving medical care

Subject 4: Theoretical bases of quality management of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Definition of the concepts "quality management and quality management of medical care"
2. Models of quality management of medical care, their comparative analysis and practical applicability
3. Quality management methodology. International quality standards.

Questions for independent study

1. Strategy of continuous improvement of quality
2. Historical aspects of studying problems of assessment of quality of medical care.

Subject 5: Standardization in health care as the mechanism of quality management of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Medico-economic standards of medical care.
2. Assessment of quality of medical care on the basis of medico-economic standards.
3. Levels of medical standards (federal, regional, local).
4. Clinical guides and protocols of maintaining patients

Questions for independent study:

1. Standards on resources or structural approach to quality management of medical care.
2. Standards on processes or procedural approach to quality management of medical care.
3. Standards on result or productive approach to quality management of medical care.
4. International experience of development of the quality standards of medical care

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	Form	
F-Working program of the discipline		

Subject 6: Ensuring quality of medical care in MO

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Ensuring quality of medical care in MO
2. The organization of quality management of work in MO
3. The system of ensuring quality of medical services in out-patient and polyclinic institutions
4. The system of ensuring quality of medical services in stationary institutions

Questions for independent study:

1. Indicators of quality of medical and diagnostic process in a multi-type hospital

Subject 7: Organization of quality control of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Method of expert evaluations of quality of medical care
2. Coefficient of quality of delivery of health care. Method for determining.
3. Stages of carrying out expert assessment of quality of medical care
4. Analysis of quality and efficiency of medical care.
5. Departmental examination of quality of medical care
6. Non-departmental examination of quality of medical care
7. Organization and carrying out internal (departmental) and external (non-departmental) quality control of medical care.

Questions for independent study:

1. Independent auditor examination of quality control of medical care

Subject 8: Assessment of quality of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Methods of assessment of volumes and quality of medical care.
2. Indicators of quality of medical care in MO
3. Coefficient of integrated assessment of quality of technological process (medical and diagnostic, preventive).

Questions for independent study:

1. Assessment of quality of medical care on model of the end results.

Subject 9: Licensing and certification in the system of ensuring quality of medical care. Modern problems of quality of medical care

(Carrying out form – practical occupation)

Questions for discussion on occupation:

1. Licensing of medical activity.
2. Legal and organizational technology of carrying out licensing.
3. Order of obtaining license.
4. Accreditation. Main objective of accreditation.
5. Certification. Certification stages.
6. Ensuring availability and quality of medical care in modern health care.
7. The factors promoting improvement of quality of medical care.

Questions for independent study:

1. Modern reforms of health care. Concept of improvement of quality of medical care.
2. Basic reasons of dissatisfaction of patients with the provided medical care.
3. Modern problems of quality of medical care

Ministry of Science and Higher Education of the Russian Federation Ulyanovsk State University	Form	
F-Working program of the discipline		

7. LABORATORY WORKS (LABORATORY WORKSHOP)

This type of work is not provided unitary enterprise

8. SUBJECT OF REPORTS

1. Use of indicators of health of the population for assessment of quality of medical care
2. A. Donabedian's triad in assessment of quality of medical care
3. Observance of the rights of the patient as one of conditions of quality of medical care
4. Development and deployment in practice of health care of strategy of continuous improvement of quality of medical care
5. Evolution of study and improvement of problems of quality of medical care.
6. Structural approach in quality management of medical care.
7. Procedural approach in quality management of medical care.
8. Productive approach in quality management of medical care.
9. International experience of development of the quality standards of medical care
10. Assessment of quality of medical care in a multi-type hospital
11. Purpose and order of conducting independent auditor examination of quality control of medical care
12. Methods of assessment of quality of medical care in the medical organization. Assessment of quality of medical care on model of the end results.
13. Role of modern reforms of health care in improvement of quality of medical care.
14. Sociological methods in studying satisfaction of patients with quality with medical care
15. Problems of quality of medical care in modern health care

Requirements to contents of reports, volume, registration:

On the title page: report subject, Full name student and signature of the student, Full name. the teacher who checked the report, assessment for the report, the signature of the teacher.

Structure of the report: contents (table of contents); introduction, the main part opening a report subject; conclusion or conclusions; list of references.

The volume of the report is not less than 10 pages. Literature for the last 5 years, not less than 3 sources

9. LIST OF QUESTIONS TO OFFSET

1. Health of the population and methods of its study. A role of indicators of health in assessment of quality of medical care. Incidence, technique of studying population morbidity.
2. Technique of the analysis of indicators of activity of the medical organizations. Indicators of quality of medical care.
3. Organization of a statistical research on collection of information of indicators of health of the population.
4. Concepts "quality", "quality of medical care". Characteristics of quality of medical care. Components of quality of medical care
5. The main characteristics of quality of medical care according to A. Donabedian: effectiveness, efficiency, optimality, acceptability, legality, justice, impartiality.
6. Basic laws of the Russian Federation and bylaws on problems of quality of medical care. Orders MZ Russian Federation on a control system of quality of medical care.
7. The rights of the patient when receiving medical care. Basic reasons of dissatisfaction of patients with the provided medical care.
8. Orders and standards of medical care
9. Definition of the concepts "quality management and quality management of medical care". Models of quality management of medical care, their comparative analysis and practical applicability
10. Quality management methodology. International quality standards.
11. Historical aspects of studying problems of assessment of quality of medical care. Strategy of continuous improvement of quality

12. Medico-economic standards of medical care. Levels of medical standards (federal, regional, local).
13. Assessment of quality of medical care on the basis of medico-economic standards. Clinical guides and protocols of maintaining patients
14. Standards on resources (structural approach), processes (procedural approach), result (productive approach) to quality management of medical care.
15. International experience of development of the quality standards of medical care.
16. Ensuring quality of medical care in MO. The organization of quality management of work in MO
17. The system of ensuring quality of medical services in the out-patient and polyclinic and stationary medical organizations
18. Indicators of quality of medical and diagnostic process in a multi-type hospital
19. Method of expert evaluations of quality of medical care. Stages of carrying out expert assessment of quality of medical care
20. Indicators of quality of medical care in MO. Assessment of quality of medical care on model of the end results.
21. Analysis of quality and efficiency of medical care. Coefficient of quality of delivery of health care. Method for determining.
22. Types of quality control of medical care. Departmental examination of quality of medical care. Non-departmental examination of quality of medical care. Independent auditor examination.
23. Organization and carrying out internal (departmental) and external (non-departmental) quality control of medical care.
24. Methods of assessment of volumes and quality of medical care. Coefficient of integrated assessment of quality of technological process (medical and diagnostic, preventive).
25. Licensing of medical activity. Legal and organizational technology of carrying out licensing. Order of obtaining license.
26. Accreditation. Main objective of accreditation.
27. Certification. Certification stages.
28. Ensuring availability and quality of medical care in modern health care.
29. Modern reforms of health care. Concept of improvement of quality of medical care.
30. Modern problems of quality of medical care. The factors promoting improvement of quality of medical care.

12. MATERIAL SUPPORT OF DISCIPLINE

Audiences for carrying out a practical training (structural unit GP State Healthcare Institution No. 1 of S.M. Kirov, Engels St. 27, lecture hall 1, 2, 3) for carrying out the current control and intermediate certification are completed with specialized furniture, an educational board and also there is a set of the multimedia equipment, a multimedia projector, the screen, acoustic columns.

13. SPECIAL CONDITIONS FOR STUDENTS WITH LIMITED OPPORTUNITIES OF HEALTH

Training students with disabilities is carried out taking into account the peculiarities of psychophysical development, individual capabilities and health of such students. Education of students with disabilities can be organized in conjunction with other students, and separately. If necessary, students from among persons with disabilities (at the request of the student) may be offered one of the following options for the perception of information, taking into account their individual psychophysical characteristics:

- for persons with visual impairment: in printed form in large print; in the form of an electronic document; in the form of an audio file (translation of educational materials into audio format); in printed form in Braille; individual consultations with the involvement of a special translator; individual tasks and consultations.
- for persons with hearing impairment: in printed form; in the form of an electronic document; video materials with subtitles; individual consultations with the assistance of a sign language interpreter; individual tasks and consultations.
- for persons with musculoskeletal disorders: in printed form; in the form of an electronic document; in the form of an audio file; individual tasks and consultations."
- if it is necessary to use partially or exclusively remote educational technologies in the educational process, the organization of work of teaching staff with students with disabilities is provided in an electronic information and educational environment, taking into account their individual psychological characteristics.
