F-Educational plan of the discipline		

1 OBJECTIVES AND AIM OF THE DISCIPLINE

The purpose of teaching gynecology is to train a highly qualified doctor who has certain knowledge in the field of obstetrics and gynecology, taking into account further training and professional activity in the specialty "medical care". Obstetrics and gynecology is one of the main sections of the medical specialty. Based on the knowledge of normal, pathological anatomy, topographic anatomy, normal and pathological physiology of the reproductive system of women, symptomatology of the most important forms of pathological conditions of the female genital organs, the student should be able to logically justify the diagnosis of diseases, conduct differential diagnosis, therapy, prevention and rehabilitation of patients, be able to provide medical assistance in emergency conditions to patients with gynecological diseases.

Tasks of mastering the discipline:

1. Acquaintance with the organization of the work of the gynecological hospital, the main indicators of its activity.
2. Mastering the main stages of medical and diagnostic work with gynecological patients in the process of independent medical activity with the control and correction of its teacher, leading practical classes.
3. Assimilation and consolidation of practical skills and abilities on a mannequin and at the patient's bedside.
4. Formation of the ability to make and justify a clinical diagnosis, to conduct a differential diagnosis of pathological conditions of gynecological patients, complications of gynecological diseases.
5. Conducting sanitary and educational work among gynecological patients.

2. PLACE OF THE SUBJECT IN THE STRUCTURE OF GEP:

The study of the discipline "Topical issues of gynecology" is carried out in the 6th year (XI-XII semesters), the discipline belongs to Block 1 "Disciplines (modules)", which includes disciplines (modules) related to the basic part of the program and disciplines (modules) related to its variable part. In accordance with the Federal State Educational Standard, the discipline "Topical issues of gynecology" belongs to the variable part of the mandatory disciplines of the professional cycle (B1. V. 03)

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

The total labor intensity is 3 ZET (108 academic hours)

Semester	Disciplines (modules)	PC 2	PC3
1,2	Psychology and pedagogy of medical activity	+	
2	Immunology	+	+
4,5	Propaedeutics of internal diseases	+	+
4,5	General surgery	+	+
5,6,12	Pathological anatomy, clinical pathological anatomy	+	
6,7	Topographic anatomy and operative surgery	+	
7	Dentistry	+	+
8	Dermatovenerology	+	+
7,8	Neurology, medical genetics, neurosurgery	+	+
7	Otorhinolaryngology	+	+
7,8	Pediatrics	+	+
7,8	Faculty Surgery	+	+
7,8,9,10,11,12	Obstetrics and gynecology	+	+
7,8	Faculty therapy	+	+
9	Ophthalmology	+	+
9	Occupational diseases	+	+

3. LIST OF EXPECTED RESULTS OF INSTRUCTION ON THE SUBJECT (UNIT), CORELATED WITH PLANNED RESULTS OF COMPLETING THE PROGRAM

The study of the subject «Topical issues of gynecology» within the completion of the educational program is directed towards the formation of the following general and professional competences in students:

Code and name of the implemented competence	Code and name of the indicator of achievement of general professional competence
PC- 2 Readiness to collect and analyze patient complaints, medical history data, examination results, laboratory, instrumental, pathoanatomic and other studies in order to recognize the condition or establish the presence or absence of the disease	Facts: propaedeutics the most common gynecological diseases, pathological conditions major and minor complaints, gynecological diseases, the sequence of collection gynecologic history, characteristics of the menstrual cycle, reproductive history, gynaecological and somatic diseases, the sequence of the pelvic examination: inspection of the external genitalia, examination of the vagina and cervix in the mirrors, bimanual examination; modern methods of clinical laboratory and instrumental diagnostics in gynecology Be able to: collect complaints and anamnesis from a gynecological patient, conduct a general and gynecological examination, interpret the results of laboratory and instrumental research methods in order to recognize a pathological condition or establish the presence or absence of a disease To possess: the technique of collecting and analyzing complaints, an amnesis, the technique of conducting a gynecological examination
PC-3 Readiness to manage and treat patients with various nosological forms in outpatient and day hospital conditions	Facts: the main clinical manifestations of uterine fibroids, endometriosis, inflammatory diseases of specific and non-specific etiology, menstrual cycle disorders, pathological processes on the cervix; research methods used in gynecology; algorithm for examining patients with various gynecological pathologies; formulation of gynecological diagnoses; Be able to: diagnose gynecological pathology based on complaints, anamnesis, objective research; formulate a diagnosis, make an algorithm for examining the patient; interpret the results of additional research methods; prescribe treatment and monitor its effectiveness To possess: the skills of formulating a diagnosis

4. Volume of the subject

4.1. Volume of the subject in credit points (total): 3 credit points

4.2. On types of academic workload (in hours): 108

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

Type of academic work	Number of hours (form of education)		
	Total according to the plan	Including on semestersx	
		XI	XII
1	2	3	4
Work of students with a teacher:	108		
practical classes and seminars	68	34	34
Self-study work	40	20	20
Current control (tests, situational tasks)		+	+
Types of intermediate attestation (examination, test)		credit	credit
Total number of hours on the subject	108		

4.3. The content of the discipline. Distribution of hours by topics and types of academic work:

Form of study: full-time

Name of sections and themes	total	Types of training sessions					The form of the current control of classes
		Classroom classes			Classes in an interactive form	Individual work	
		Lectures	Practical classes and seminars	Laboratory work, workshops

Topic 8. Infertility in marriage. Assisted reproductive technologies			6,0			4	Tests, situational tasks
Topic 9. Tumors and tumor-like formations of			6,0		1	4	Tests, situational tasks

the ovaries. Types of surgical interventions							
Topic 10. Acute abdomen in gynecological practice			6,0			4	Tests, situational tasks
Topic 11 Inflammatory diseases of specific etiology			6			2	Tests, situational tasks

If it is necessary to use partially or exclusively distance learning technologies in the educational process, it should be noted that the total number of hours (c.u.) set by the Department of discipline/specialty for each discipline/practice remains unchanged and is implemented in full. In this case, in the corresponding section of the educational program the total number of hours of work with students in accordance with the educational plan is allocated and the number of hours for conducting classes in a remote format using e-learning (online courses, lectures and seminars in videoconference mode, virtual practical classes, laboratory work in the form of virtual analogues, calculation and graphic works, individual tasks in the electronic information and educational environment, etc.) Training and industrial practice for all areas of discipline/specialties of all forms of training can be partially or fully implemented in a remote format.

5. COURSE CONTENT

6. TOPICS OF PRACTICAL CLASSES AND SEMINARS (FOR DISCUSSING AND SELF-PREPARING OF STUDENTS)

Topic 1. Neuro-humoral regulation of the menstrual cycle

Security questions:

- 1) definition of the concept of menstrual cycle
- 2) characteristics of menstruation
- 3) the role of the cerebral cortex in the regulation of the menstrual cycle
- 4) the hypothalamus and its role in the regulation of the cycle
- 5) pituitary hormones and their biological role
- 6) sex hormones and their effect on target organs
- 7) functional diagnostics tests

Topic 2. Uterine fibroids. Modern aspects of pathogenesis. Methods of surgical and conservative treatment

Security questions:

- 1) Modern theories of the pathogenesis of fibroids of the uterus
- 2) Classification, clinic, diagnostic methods

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

- 3) Conservative methods of treatment (progesterone antagonists, selective modulators progesterone prescription)
- 4) Surgical methods of treatment. Types of conservative myomectomies (enucleation myomatous node, intersection of the leg of the subserous myomatous node, hysteroresectoscopy)
- 5) Radical operations for uterine fibroids (supravaginal amputation of the uterus, extirpation of the uterus)
- 6) Indications for the choice of the treatment method.
- 7) Rehabilitation measures

Topic 3. Endometriosis: debatable issues of pathogenesis and therapy

Security questions:

- 1) definition of the concept, classification.
- 2) modern ideas about the occurrence of endometriosis
- 3) clinical manifestations of genital endometriosis
- 4) diagnostic methods: ultrasound, X-ray, endoscopic
- 5) surgical and conservative methods of endometriosis therapy
- 6) rehabilitation of patients: restoration of menstrual and reproductive functions
- 7) endometriosis and ART

Topic 4. Abnormal uterine bleeding

Security questions:

- 1) definition of the concept of AUB
- 2) classification of PALM and COEIN.
- 3) methods for diagnosing bleeding caused by ovulation disorders
- 4) types and techniques of hemostasis
- 5) regulation of the menstrual cycle in different age periods.

Topic 5. Neuro-endocrine syndromes.

Security questions:

- 1) premenstrual syndrome: etiopathogenesis, clinical manifestations, classification, differential diagnosis
- 2) modern approaches to treatment
- 3) menopausal syndrome: etiopathogenesis, clinic, diagnosis
- 4) therapy of menopausal syndrome: lifestyle changes, phytoestrogens, menopausal hormone therapy
- 5) post-castration syndrome: etiopathogenesis, clinic, diagnosis
- 6) hormone replacement therapy

Topic 6. Inflammatory diseases of the female genital organs of non-specific etiology.

Security questions:

- 1) pathogens of nonspecific inflammatory diseases
- 2) classification of vaginal microflora
- 3) the concept of biocenosis
- 4) inflammatory diseases of the lower genital tract (colpitis, cervicitis, bartholinitis): clinic, diagnosis, treatment methods
- 5) inflammatory diseases of the upper part (metroendometritis, salpingoophoritis, pelvioperitonitis, parametritis): clinic, diagnosis, treatment methods.

Topic 7. Benign and precancerous diseases of the cervix . Cervical cancer.

Security questions:

- 1) The concept of benign diseases of the cervix (ectopia, ectropion, cervicitis,

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

leukoplakia, polyp)

- 2) Precancerous diseases of the cervix (dysplasia of various degrees of severity.
- 3) Cervical cancer: clinical classification. Causes of occurrence.
- 4) Human papillomavirus and its role in the occurrence of cervical cancer.
- 5) Basic and additional research methods in the diagnosis of cervical pathology uterus)
- 6) Tactics of management of patients with cervical pathology
- 7) Dispensary observation

Topic 8. Infertility in marriage. Assisted reproductive technologies

Security questions:

- 1) Definition of the term infertile marriage
- 2) Male and female infertility
- 3) Classification of male and female infertility.
- 4) The algorithm for diagnosing female infertility.
- 5) Algorithm for diagnosing male infertility
- 6) Methods of treatment. ART.
- 7) Indications for referral to ART, the required amount of examination

Topic 9. Tumors and tumor-like formations of the ovaries

Security questions:

- 1) The concept of tumor-like formation of the ovaries
- 2) Types of cysts: functional, retention, paraovarial, endometrioid
- 3) True ovarian tumors, histological classification
- 4) Methods of diagnosis of ovarian formations
- 5) Tactics of management of patients with a true tumor and cyst
- 6) Types of surgical interventions

Topic 10. Acute abdomen in gynecological practice.

Security questions:

- 1) Definition of the concept
- 2) The causes of acute abdominal pain in gynecology.
- 3) Ectopic pregnancy. Clinic. Diagnostics. The algorithm of medical measures.
- 4) Rehabilitation of patients after ectopic pregnancy.
- 5) Twist the legs of the ovarian tumor. Clinic. Diagnostics. Medical tactics.
- 6) Ovarian apoplexy. Clinic. Diagnostics. Medical tactics depending on the form of apoplexy (anemic, painful).
- 7) Tuboovarian formations of inflammatory etiology. Clinic. Diagnostics. Medical tactics.

Topic 11. Inflammatory diseases of the female genital organs specific etiology.

Security questions:

- 1) pathogens of sexually transmitted infections
- 2) definition of the concept of specific inflammatory diseases
- 3) chlamydia, features of the pathogen, ways of infection, clinic, methods diagnostics
- 4) antibacterial therapy of chlamydia
- 5) mycoplasma infection of the genitals: characteristics of pathogens, clinic, methods of diagnosis and treatment
- 6) candidiasis, features of the pathogen, classification, clinic, diagnosis. Methods

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

treatment.

7) genital herpes, features of the pathogen, ways of infection, clinic, diagnostic methods, therapy

8) trichomoniasis, features of the pathogen, ways of infection, clinic, diagnostics, methods of treatment.

7 LABORATORY WORK IS NOT PROVIDED

8. SUBJECTS OF COURSE PAPERS, TESTS, ESSAYS

1. Metabolic disorders in perimenopausal women
2. The role of combined viral infection in the development of cervical cancer
3. Prolonged methods of contraception
4. Hemorrhagic shock, diagnosis, emergency care
5. Polycystic ovary syndrome and reproductive problems
6. Persistent herpesvirus infection, diagnosis, treatment
7. Cardiovascular system in women of elegant age
8. Neuropsychiatric manifestations of menopausal syndrome
9. Infertile marriage. ART methods
10. Conservative surgery for uterine fibroids

9. QUESTIONS FOR FOR THE TEST

1. The structure of the ovaries and their physiological role in the female body.
2. Blood supply and innervation of the internal genitals of a woman.
3. The position of the uterus and appendages in the pelvis. Hanging, supporting and fixing devices.
4. The structure and function of the fallopian tubes.
5. The structure and function of the uterus.
6. The structure of the vagina. Cyclic changes in the mucosa and contents of the vagina, their diagnostic value.
7. Topographic anatomy of the external genitalia.
8. Anatomy of the pelvic floor.
9. Anatomy of the anterior abdominal wall.
10. Hormones of the hypothalamic-pituitary system and their biological effect.
11. Ovarian hormones and their biological effect.
12. Hypothalamic-pituitary regulation of the menstrual cycle.
13. Ovarian-menstrual cycle.
14. Tests of functional diagnostics, interpretation of their results.
15. Juvenile uterine bleeding. Etiopathogenesis, clinic, diagnosis and treatment.
16. Principles of hormone therapy in gynecology.
17. Anovulatory bleeding. Methods of stopping bleeding. Hormonal stasis. Correction of ovarian function.
18. Uterine bleeding in the menopausal period. Etiopathogenesis, clinic, features of hemostasis, principles of treatment.
19. Pelvioperitonitis: clinic, diagnosis, principles of therapy.

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

20. Ovarian cysts. Classification, clinic, diagnosis, treatment.
21. Ovarian tumors. Classification, etiopathogenesis, clinic, diagnosis, treatment.
22. External endometriosis. Definition, etiopathogenesis, clinic, diagnosis, treatment
23. Internal endometriosis. Definition of the concept, etiopathogenesis, clinic, diagnosis, treatment methods.
24. Salpingoophorites. Etiopathogenesis, clinic, diagnosis, treatment.
25. Cervical cancer. Classification, etiology, diagnosis, treatment methods. Prevention of cervical cancer.
26. Benign diseases of the cervix. Classification, diagnosis, treatment methods.
27. Precancerous diseases of the cervix. Classification, diagnosis, treatment methods.
28. Cervical biopsy. Indications, contraindications. The technique of execution.
29. Colposcopy is simple and extended. Indications, execution technique.
30. Hysterosalpingography. Indications, contraindications. The technique of execution.
31. Hysteroscopy. Indications, contraindications. The technique of execution.
32. Diagnostic curettage of the uterine cavity. Indications, contraindications. The technique of execution.
33. Cystectomy. Indication, anesthesia. Operation technique
34. Amputation of the cervix. Varieties, indications, shade.
35. Clinic of disturbed ectopic pregnancy (tubal abortion, rupture of the fallopian tube)
36. Methods of diagnosis of ectopic pregnancy
37. Tubectomy (surgery technique)
38. Hemorrhagic shock: diagnosis, intensive care
39. Uterine fibroids: clinical picture
40. Methods of diagnosing uterine fibroids
41. Indications for surgical treatment for uterine fibroids
42. Types and techniques of conservative myomectomies
43. Radical surgical interventions for uterine fibroids (surgery technique)
44. Conservative therapy of uterine fibroids

10. SELF-STUDY WORK OF STUDENTS

The form of training is full-time

№	Name of the section / subject	Types ofSSW	Total number of hours	Current control
1	Topic 1. Neuro-humoral regulation of the menstrual cycle		2	Tests questions for the test

11. MATERIAL AND TECHNICAL SUPPORT OF THE DISCIPLINE:

Occupied areas of the Department of Obstetrics and Gynecology:

GUZ GKB No. 1 (Perinatal Center)

432064, Ulyanovsk region, Ulyanovsk, Doctor Surov Ave., 4.

1st floor, non-residential premises:

- room No. 21– 10.6 m² (women's wardrobe)

- room No. 22– 11.2 m² (men's wardrobe)

The list of premises required for conducting classroom classes in the discipline 432048, Ulyanovsk region, Ulyanovsk GUZ OKB, Perinatal Center, III Internationala str., 7 *

Professor's office (28.8 m²) *

Classroom No. 1 (16.97 m²) *

Classroom No. 2 (16.2 m²) *

Classroom No. 3 (29.64 m²) *

conference hall – 42 m²

432064, Ulyanovsk region, Ulyanovsk, GUZ GKB No. 1 Perinatal Center, 4 Doctor Surov Ave. *

Conference hall No. 34 (65, 8m²) *

Classroom No. 33 (16m²) *

professor's office – 14 sq. m. •

study room No. 1-14 sq. m. •

study room No. 3 – 20 sq. m. *

Classroom No. 2 (16, 2m²) *

Classroom No. 4 (13, 7m²)

The premises are equipped with a set of student furniture for 14-20 seats, a classroom board, a teacher's workplace Lecture hall (300-400 seats) 432017, Ulyanovsk region, Ulyanovsk, ul. 106 Sviyaga River Embankment (building 1, building 2, building 4)

Simulation class: 432017, Ulyanovsk region, Ulyanovsk, ul.Embankment of the Sviyaga river,106 (building 6) 432048, Ulyanovsk region, Ulyanovsk GUZ OKB, Perinatal Center, III Internationala str., 7 (building 4).

1.Obstetric dummy or dummy of a woman in labor F1010R

1. Demonstration and practical skills throughout the delivery process

2. Determination of fetal heart rate, the possibility of change in the range of 60-200 beats / min

3. Palpation of the abdomen of a woman in labor (Leopold's reception)

4. Practicing the skills of vaginal childbirth

5. Childbirth using a vacuum extractor

6. practicing episiotomy skills

7. Examinations at the 2nd month of pregnancy

8. Electronic controller in Russian with touch control

9. Russian-language voice prompts

2. Basic virtual laparoscopy simulator ENSIM-B.LPR.01

- Basic skills in endoscopic surgery;

- Some important skills in laparoscopy;

- A set of training tasks for suturing and tying knots;

- Some important skills of suturing and tying knots;

- Practical skills in laparoscopic cholecystectomy;

- Performing a total cholecystectomy operation;

- Skills of performing gynecological operations;

Ministry of science and high education RF	Form	
F-Educational plan of the discipline		

- Performing a total hysterectomy operation;
- Performing laparoscopic appendectomy operations;
- Vascular treatment, mobilization and crossing of the sigmoid colon.

3. Robotic dummy simulator of a woman in labor for processing obstetric, gynecological, neonatological skills, as well as providing emergency care in childbirth and newborns F 56 Breathing: imitation of spontaneous breathing with chest movement up and down, a variety of breathing types, auscultation of respiratory noises of all types, gr. The cell rises and falls during artificial ventilation, the position and depth of the tube can be determined during orotracheal intubation.

Blood circulation: cardiac auscultation of all types, blood pressure measurement, imitation of arterial pulse.

First aid: cardiopulmonary resuscitation, support simulation of defibrillation, system of administration of medications, I / m injections, I / v injections. Postpartum nursing care. Obstetrics: normal childbirth, delivery with a vacuum extractor, difficult labor with shoulder presentation, childbirth with pelvic presentation. Umbilical cord prolapse. Placenta previa. Caesarean section. External obstetric turn. Four receptions of Leopold. Placental abruption. Postpartum bleeding. Massage of the postpartum uterus. Suturing of the perineum. Monitoring of vital functions.

4. Simulator for practicing skills of gynecological examination, colposcopy.

1. Includes all the functions of the F30S simulator.

2. Allows you to evaluate the hysteroscopic picture.

3. Possibility of laparoscopic visualization: the uterus, appendages, round ligament and other structures are available for visualization

4. The possibility of introducing female condoms, a contraceptive sponge, a cervical cap and other contraceptives.

5. The cervix and uterus are replaceable.

6. Simulator for suturing the perineum.

You can practice the correct use of tools and various techniques of tying knots.

GUZ GKB No. 1 Perinatal Center, and GUZ UOKB, Perinatal Center

- Computers (3 pcs.), laptop (3 pcs.).
- Multimedia projector (2 pcs.).
- A set of tools for obstetric and gynecological operations, KIWI vacuum extractor, models of female pelvises, phantoms, dolls.
- GD/F56 – robotic dummy simulator of a woman in labor with a dummy fetus,
- phantom forearms for Implanon insertion.
- Ultrasound machine-Aloka-500.
- * colposcope "Olympius"
- hysteroscope.
- Transvaginal sensor.
- Phantom for breast examination.
- Simulator for practicing the skills of gynecological examination, hysteroscopy and colposcopy.
- Simulator of difficult childbirth.
- A model of maternity care using a vacuum extractor.
- A model of the spine with a pelvis with dedicated zones.
- A model to demonstrate the process of childbirth (pelvic skeleton and 2 fetal heads).
- A model of a female pelvis with muscles.
- Enlarged placenta model.

Lecture hall (200 seats)

Technical means: laptop, multimedia projector, screen

Students conduct independent work in the classrooms of GUZ GKB No. 1 Perinatal Center, and GUZ

UOKB, Perinatal Center or the library of UISU 432017, Ulyanovsk region, Ulyanovsk, ul. 106 Sviyaga River Embankment (buildings 1 and 2)

Tables

- * in gynecology: menstrual cycle-7
- * operative gynecology – 30
- * research methods in gynecology – 8

• Videos:

- climonorm;
- endoscopic myomectomy;
- malformations of the female genital organs;
- laparoscopy in gynecology;
- bacterial vaginosis;
- external endometriosis;

Library: conference materials, textbooks, Ulyanovsk Medical and Biological Journal, etc. GUZ GKB No. 1 Perinatal Center, and GUZ UOKB, Perinatal Center

- * Computers (2 pcs), laptop (2 pcs.), netbook (1 pc.).
- * Multimedia projector,
- * A set of tools for obstetric and gynecological operations, a KIWI vacuum extractor, models of female pelvises, phantoms, dolls,
- * GD/F56-a robotic dummy simulator of a woman in labor with a fetal dummy,
- * phantom of the forearms for Implanon insertion,
- * Ultrasound machine-Aloka-500,
- * colposcope,
- * a hysteroscope.

Classrooms for lectures, seminars, group and individual consultations).

The premises for independent work are equipped with computer equipment with the ability to connect to the Internet and provide access to an electronic information and educational environment, an electronic library system.

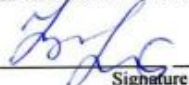

The classrooms are equipped with specialized furniture, an educational board. Lecture halls are equipped with multimedia equipment to provide information to a large audience. The list of equipment used in the educational process is indicated in accordance with the information on the material and technical support and equipment of the educational process posted on the official website of the USU in the section "Information about the educational organization".

12. SPECIAL CONDITIONS FOR STUDENTS WITH DISABILITIES

Training students with disabilities is carried out taking into account the peculiarities of psychophysical development, individual capabilities and health of such students. Education of students with disabilities can be organized in conjunction with other students, and separately. If necessary, students from among persons with disabilities (at the request of the student) may be offered one of the following options for the perception of information, taking into account their individual psychophysical characteristics:

11. for persons with visual impairment: in printed form in large print; in the form of an electronic document; in the form of an audio file (translation of educational materials into audio format); in printed form in Braille; individual consultations with the involvement of a tiflosurdoperevodchika; individual tasks and consultations.
12. for persons with hearing impairment: in printed form; in the form of an electronic document; video materials with subtitles; individual consultations with the assistance of a sign language interpreter; individual tasks and consultations.
13. for persons with musculoskeletal disorders: in printed form; in the form of an electronic document; in the form of an audio file; individual tasks and consultations."
