Ministry of science and high education RF Ulyanovsk State University	Form	
F-Educational plan of the discipline		

1. OBJECTIVES AND AIM

The practical training purposes forming of professional skills of care for therapeutic patients, receiving the first experience of professional activity in the conditions of the simulyatsionny center of medical modeling and also forming and development of the competences necessary for work of junior medical staff.

Problems of passing experts study the check sheets with the subsequent development of practical skills (according to the list) in the conditions of the simulyatsionny center of medical modeling;

- acquaintance to the sanitary and hygienic mode and organization of work of the accident ward, therapeutic hospital;
- acquaintance to rules of care for therapeutic patients;
- acquaintance to the principles of rendering emergency aid in diseases of internals;
- acquaintance to tool and laboratory methods of a research in diseases of internals.

2. PLACE OF THE SUBJECT IN THE STRUCTURE OF GEP:

Educational practice " Caring for patients with a therapeutic profile " belongs to the B.1.0 Block (obligatory part) 31.05.01 "Medical business".

Educational practice " Caring for patients with a therapeutic profile " is conducted in the 2nd semester (course 1).

Educational practice "Patient care of a therapeutic profile" precedes the next work practice – "The assistant to junior medical staff", "The assistant to the charge nurse", "The assistant to the nurse", Practice on obtaining professional abilities and experience of professional activity at positions of average medical personnel, "Diagnostic practice".

3. LIST OF EXPECTED RESULTS OF INSTRUCTION ON THE SUBJECT (UNIT), CORELATED WITH PLANNED RESULTS OF COMPLETING THE PROGRAM

The study of the subject «Basis of functional and laboratory diagnosis» within the completion of the educational program is directed towards the formation of the following general and professional competences in students:

Code and name of the general professional competence	Code and name of the indicator of achievement of general professional competence
GPC-4. Able to use medical devices provided for by the procedure for the provision of medical care, as well as conduct examinations of a patient in order to establish a diagnosis.	<p>ID-1 gpc-4 basic principles of management and organization of medical care to the population; diagnostic methods, diagnostic capabilities of methods of direct examination of a patient's therapeutic profile, modern methods of clinical, laboratory instrumental examination of patients (including endoscopic, radiological methods, ultrasound diagnostics); and rational choice of medicines in the treatment of emergency conditions in patients.</p> <p>ID-2 gpc-4 collect anamnesis, interview the patient and / or his relatives, conduct a physical</p>

Ministry of science and high education RF Ulyanovsk State University F-Educational plan of the discipline	Form	
---	------	--

	<p>examination of the patient (examination, measurement of blood pressure, determination of the properties of the arterial pulse, etc.); assess the patient's condition in order to make a decision on the need to provide him with medical care; set priorities for solving patient health problems: critical (terminal) condition, condition with pain syndrome, condition with chronic disease, condition with infectious disease, disability, etc .; apply various methods of drug administration.</p> <p>ID-3 gpc-4 methods of using medical devices in the diagnosis and treatment of therapeutic patients</p>
<p>PC -2 Readiness for collecting and the analysis of complaints of the patient, data of his anamnesis, results of inspection, laboratory, tool, pathoanatomical and other researches for recognition of a state or establishment of the fact of existence or absence of a disease</p>	<p>ID-1 pc-2 diagnostic methods, diagnostic capabilities of methods of direct examination of a therapeutic patient, modern methods of clinical, laboratory, instrumental examination of patients (including endoscopic, radiological methods, ultrasound diagnostics).</p> <p>ID-2 pc-2 to define the status of the patient: to collect the anamnesis, to conduct survey of the patient and/or his relatives,</p> <p>ID-3 pc-2 by methods of all-clinical objective inspection (inquiry, survey)</p>

4. Place and date of the practice

Educational practice is conducted in the 2nd semester of 1 course in The Training center of medical technology IMEIFK ULSU.

. Content of Practice

Total volume of practice		Duration of practice
Credit units	Hours	Weeks
3	108	2
Contact work	12	
Self-work	96

		respiratory movements. The hot-water bottle, a bubble with ice warming compresses.			
4.	Sanitary and hygienic mode and organization of work of reception, therapeutic department of a hospital.	Medical documentation. Thermometry. Anthropometry. Transportation of patients. Processing of patients with a pediculosis.	10		Poll, control of the diary and check sheets
5.	Observation and patient care with diseases of a respiratory system.	Main symptoms of diseases of a respiratory system. The pre-medical help at an attack to bronchial asthma. A technique of use of a pocket inhaler at a suffocation attack. The principles of rendering emergency aid in pulmonary bleeding. Use of nebulizers and powder inhalers. Ways of supply of oxygen. Peak flowmetry method. Collecting a phlegm for laboratory analyses.	12		Poll, control of the diary and check sheets
6.	Observation and patient care with diseases of a cardiovascular system.	Arterial pulse and its properties. Rules of measurement of arterial blood pressure. Classification of levels of arterial blood pressure. Symptoms of basic diseases of a cardiovascular system. The principles of rendering emergency aid at a stenocardia attack, a myocardial infarction, cardiac asthma, hypertensive crisis.	12	2	Poll, control of the diary and check sheets

Ministry of science and high education RF Ulyanovsk State University F-Educational plan of the discipline	Form	
---	------	--

7.	Observation of patients with digestive tract diseases.	Gastric lavage. Rendering emergency aid in vomiting. Collecting emetic masses for the laboratory analysis. Collecting excrements for the laboratory analysis.	12	2	Poll, control of the diary and check sheets
8.	Observation of patients with diseases of an urinary system.	Collecting analyses of urine of the general, across Nechiporenko, across Zimnitsky.	12		Poll, control of the diary and check sheets
9.	Care for bed patients.	Feeding of the bed patient. Change of next-to-skin and bed linen. Giving of an urinal and vessel. Personal hygiene of the patient. Processing and storage of bed-pans and urinals	10		Poll, control of the diary and check sheets
Final stage of practice					
10	Concluding session .	Interview following the results of practice.	12	2	The differentiated offset, control of the diary
			108	12	

7. Scientific research technologies:

This type of work is not provided.

8. Interim certification

The differentiated offset

LIST OF PRACTICAL SKILLS

1. Treatment of patients with head lice
2. Transportation of therapeutic patients
3. Anthropometry
4. Thermometry
5. Taking biological material (blood, sputum, urine) for laboratory research
6. Setting a wet (warming) compress
7. Use of an ice pack and heating pad in therapeutic patients
8. Collection of syringes, collection of medicines from ampoules, collection of droppers
9. Carrying out intradermal injections

Ministry of science and high education RF Ulyanovsk State University	Form	
F-Educational plan of the discipline		

10. Conducting subcutaneous injections
11. Carrying out intramuscular injections
12. Conducting intravenous injections
13. Implementation of intravenous drip injections of drugs
14. Emergency prevention of HIV infection by injection
15. Calculation of the respiratory movements of the patient
16. Pulse examination
17. Blood pressure measurement
18. Gastric lavage
19. Use of aerosol and powder inhalers
20. Use of nebulizers
21. Conducting peak flow measurements
22. Oxygen therapy
23. Principles of emergency care in case of asthma attack
24. Principles of emergency care for pulmonary hemorrhage
25. Principles of emergency care for anaphylactic shock
26. Principles of emergency care for an attack of angina pectoris, cardiac asthma
27. Principles of emergency care for hypertensive crisis
28. Principles of emergency care for vomiting
29. Cleaning hands during injections
30. Prevention of bedsores in stroke patients
31. Change of underwear and bed linen in therapeutic patients

11. SPECIAL CONDITIONS FOR STUDENTS WITH DISABILITIES

Students with disabilities and disabilities are trained together with other students (in the study group) or individually (on the personal application of the student).

The determination of places of practice for students with disabilities and disabilities is carried out taking into account the state of health and the requirements for their availability for this category of students. At determination of places and conditions (taking into account nosological group and group of disability of the trained) of practical training on obtaining professional skills and experience of professional activity of the trained for this category of persons individual features of the trained, and also the recommendations of medical and social examination reflected in the individual program of rehabilitation concerning the recommended conditions and types of work are considered.

In determining the place of practice for students with disabilities and disabilities, special attention is paid to safety and equipment (equipment) of the workplace.

Workplaces for practice are provided by the profile organization in accordance with the following requirements:

- for students with disabilities and visually impaired - visually impaired: equipping a special workplace with General and local lighting, ensuring unhindered finding of the specified person of the workplace and the performance of individual tasks, the presence of video magnifiers, magnifying glass;
- for students with disabilities and the visually impaired - blind: vehicle specific workplace heat reference points and devices with the ability to use large boldly-contrasting font and Braille, acoustic navigation, which will enable easy finding a person in your workplace and individual assignments;
- for students with disabilities and hard of hearing - hard of hearing: equipment (equipment) of a special workplace sound amplifying equipment, telephones for the hard of hearing;
- for students with disabilities and hearing - deaf: equipping a special workplace visual indicators that convert sound signals into light, speech signals into a text running line, for the smooth finding of the specified person of his workplace and the performance of individual tasks;
- for students with disabilities and hearing impaired - with a violation of the musculoskeletal system: equipment that ensures the implementation of ergonomic principles (the most convenient for the disabled location of the elements that make up the workplace); mechanisms and devices that allow you to change the height and slope of the working surface, the position of the seat of the working chair in height and inclination, the angle of the back of the working chair; equipment with a special seat. compensating for the effort of getting up, special devices for the management and maintenance of this equipment.

Conditions of the organization and practice, preparation of reporting materials, carrying out of the current control and interim certification in practice is provided in accordance with the following requirements:

Ministry of science and high education RF Ulyanovsk State University	Form	
F-Educational plan of the discipline		

- Volume, rate, forms of performance of an individual task for the period of practice are established individually for each student of the specified categories. Depending on the nosology, contraindicated (visual, sound, muscle and other) loads are maximally reduced.
- - Educational and teaching materials on practice are presented in various forms so that students with disabilities and disabilities with hearing impairments receive information visually (documentation on practice is printed in large print; video materials and visual materials on the content of the practice are provided), with visual impairment – auditory (for example, with the use of speech synthesizer programs) or with the help of tifloinformation devices.
- The form of carrying out the current control of progress and intermediate certification for students with disabilities and disabled people is established taking into account individual psychophysical features (orally, in writing, by means of the computer, in the form of testing, etc.). If necessary, the student is given additional time to prepare a response and (or) protect the report.
- If it is necessary to use partially or exclusively remote educational technologies in the educational process, the organization of work of teaching staff with students with disabilities is provided in an electronic information and educational environment, taking into account their individual psychological characteristics
